Market Commentary

Platts Asia and Middle Eastern Gasoline Daily Market Analysis

- Vietnam's Petrolimex seeks 80,000 cu m of gasoline
- Malaysia gasoline production falls 9.11% MOM in Aug

The Asian gasoline complex was expected to be rangebound Oct. 14 as market participants continued to monitor Chinese gasoline exports in October amid firm regional demand.

Vietnam's Petrolimex was heard seeking 80,000 cubic meters of 93.5 RON gasoline for delivery over Nov. 10-22, via a tender that closed Oct. 13.

Brokers pegged the front-month FOB Singapore 92 RON gasoline swaps crack spread with Brent swaps in the $22.95-$23/barrel range at 0300 GMT, up from the Platts assessment of $22.80/b at the Oct. 13 Asian close.

Broking sources also placed the physical FOB Singapore 92 RON gasoline crack against front-month ICE Brent crude oil futures in the $34.30-$34.35/b range at 0300 GMT, up from the Platts assessment of $33.90/b at the Oct. 13 Asian close.

Gasoline Unl 97 FOB Spore Cargo <PGAMS00> assessment rationale: The FOB Singapore 97 RON gasoline assessment Oct. 14 took into consideration the adjusted 97/95 inter-ron spread in the absence of bids, offers and trades.

Gasoline Unl 92 FOB Arab Gulf Cargo <AAGJA00> assessment rationale: The FOB Arab Gulf 92 RON gasoline cargo assessment was derived as a freight netback from the FOB Singapore 92 RON marker using the following calculation: FOB Singapore 92 RON assessment minus the cost of transporting a 35,000-mt clean cargo from a basket of ports in the Persian Gulf to Singapore.

Exclusions: No market data was excluded from the Asian gasoline Platts Market on Close assessment process Oct. 14.

No market data was excluded from the Asian gasoline derivative MOC Oct. 14.

Platts is part of S&P Global Energy.

Platts FOB Fujairah Gasoline Daily Rationale & Exclusions

Gasoline 92 RON FOB Fujairah cargo <RFJFS00> assessment rationale: The assessment of FOB Fujairah 92 RON gasoline Oct. 14 took into consideration the 92 RON gasoline Mean of Platts Arab Gulf strip value of $110.81/b, as well as the cash differential for Fujairah 92 RON gasoline at $10.20/b in the absence of bids, offers and trades in the FOB Fujairah 92 RON gasoline Market on Close assessment process.

The MOPAG 92 RON gasoline strip is calculated from the November MOPAG 92 RON gasoline swap at $110.37/b and the December MOPAG 92 RON gasoline swap at $103.67/b. The cash differential took into consideration values in the FOB Fujairah 92 RON gasoline market heard in the Middle East.

Gasoline 95 RON FOB Fujairah cargo <AFUJA00> assessment rationale: The assessment of FOB Fujairah 95 RON gasoline Oct. 14 took into consideration the 95 RON gasoline MOPAG strip value of $115.81/b, as well as the cash differential for Fujairah 95 RON gasoline at $12.05/b in the absence of bids, offers and trades in the FOB Fujairah 95 RON gasoline MOC.

The MOPAG 95 RON gasoline strip is calculated from the November MOPAG 95 RON gasoline swap at $115.35/b and the December MOPAG 95 RON gasoline swap at $108.36/b. The cash differential took into consideration values in the FOB Fujairah 95 RON gasoline market heard in the Middle East.

Exclusions: No market data was excluded from the Asian gasoline MOC on Oct. 14.

Platts is part of S&P Global Energy.

Platts Asia and Middle Eastern Naphtha Daily Market Analysis

- South Korea's YNCC seeks naphtha for Dec delivery
- KPC offers 85,000 mt of naphtha for Nov. 1-11 delivery

The Asian naphtha market remained elevated Oct. 14, supported by heightened hostilities in the Middle East, including Saudi Arabia and Yemen's Houthi militants, along with Iran's threat to close the Strait of Hormuz entirely, while spot activity from South Korea emerged.

South Korea's YNCC has issued a tender seeking naphtha cargoes for both H1 and H2 December delivery. The tender closed Oct. 14, with same-day validity. The company previously purchased at least 25,000 mt of naphtha for delivery in H2 October at a premium of about $17-$18/mt to MOPJ naphtha assessments, CFR, with 30-day pricing prior to delivery.

Meanwhile, Kuwait Petroleum has concluded its tender for 85,000 mt of full-range naphtha, with a minimum 70% paraffin content for Nov. 1-11 delivery to Chiba on a DES basis via the Torm Hedwig. The tender closed Oct. 13.

Previously, the company awarded its tender for 55,000 mt of full-range naphtha, with a minimum 70% paraffin content for Nov. 1-11 delivery to Chiba on a DES basis via Capoeira. The tender closed on Oct. 12.

In the derivatives market, brokers pegged the balance-month October-November Mean of Platts Japan swaps time spread at $30/metric ton in midafternoon Asian trading Oct. 14, unchanged from the previous close.

In statistical news, Malaysia's naphtha production fell for the second consecutive month, declining 8.40% month over month to 371,770 mt in August. Year over year, production grew 25.85%. From January to August, naphtha output was up 15.88% to 3.29 million mt.

Platts is part of S&P Global Energy.

Platts Japan Naphtha Daily Rationales & Exclusions

Naphtha C+F Japan Cargo <PAAAD00> assessment rationale: The CFR Japan naphtha cargo assessment Oct. 14 took into consideration the notional values for H2 November at $1,023.25/mt, H1 December at $1,009.25/mt and H2 December at $992.25/mt, in the absence of any competitive bids or offers demonstrating value otherwise.

Platts assessed the H2 November/H1 December time spread at $14/mt and the H1 December/H2 December time spread at $17/mt.

Naphtha FOB Spore Cargo <PAAAP00> assessment rationale: The FOB Singapore naphtha assessment was derived as a freight netback from the CFR Japan naphtha first cycle assessment using the following calculation: CFR Japan naphtha first cycle assessment minus the cost of transporting a 30,000-mt clean cargo on the Singapore-to-Japan route.

Naphtha FOB Arab Gulf Cargo <PAAAA00> assessment rationale: The FOB Arab Gulf naphtha assessment was derived as a freight netback from the CFR Japan naphtha marker using the following calculation: CFR Japan naphtha marker minus the cost of transporting a 55,000-mt clean cargo from a basket of ports on the Persian Gulf-to-Japan route.

Exclusions: No data was excluded from the Oct. 14 Asian naphtha derivative Platts Market on Close assessment process.

No data was excluded from the Oct. 14 Asian naphtha MOC.

Platts is part of S&P Global Energy.

Platts FOB Fujairah Naphtha Daily Rationale & Exclusions

The Platts FOB Fujairah naphtha assessment Oct. 14 took into consideration the naphtha Mean of Platts Arab Gulf strip value at $713.92/metric ton, as well as the cash differential at $68.50/mt, in the absence of bids, offers or trades in the FOB Fujairah naphtha Platts Market on Close assessment process.

The MOPAG naphtha strip was calculated from the balance October MOPAG naphtha swap at $742.65/mt and the November MOPAG naphtha swap at $711.90/mt. The cash differential took into consideration the FOB Arab Gulf cash differential against the MOPAG naphtha physical in the absence of any competitive bids, offers or trades demonstrating value otherwise.

Exclusions: No data was excluded from the Asian naphtha MOC Oct. 14.

Platts is part of S&P Global Energy.

Platts FOB Fujairah Naphtha Bids, Offers, Trades

Bids: No bids

Offers: No offers

Trades: No trades

This assessment commentary applies to the following market data codes: Naphtha FOB Fujairah Cargo $/mt <NFJSA00>.

A broker pegged the balance October regrade swap, the premium of jet fuel over 10 ppm sulfur gasoil, at plus $2.31/barrel in midmorning Asia trading Oct. 14, up from the Platts assessment of plus $1.80/b at the Oct. 13 Asian close.

Backwardation also strengthened as the broking source pegged the front-month November-December FOB Singapore jet fuel/kerosene swap time spread at plus $3.15/b, widening from the Oct. 13 Platts assessment at plus $1.93/b.

"The market is somewhat mixed with a combination of bullish and bearish factors, as well as future uncertainty. Definitely turned more bearish after Golden Week, with news that China would resume exports, but it's still uncertain whether quotas will remain for regular exports in December. Also, what Japan will do in terms of buying during the kerosene season from November to January — uncertain but it is a bullish factor as well," said a jet fuel trader based in north Asia.

In the physical segment, Platts assessed the FOB Singapore jet fuel/kerosene cargo cash differential at plus $3.96/b to the Mean of Platts Singapore jet fuel/kerosene assessments Oct. 13, up 24 cents/b day over day.

The Platts FOB Singapore jet fuel/kerosene cargo crack spread against front-month cash Dubai, which measures the relative strength of the product to the crude it is refined from, widened $5.42/b day over day to $66/b Oct. 13.

Japan's second-largest refiner, Idemitsu Kosan, restarted the sole crude distillation unit at its Keihin refinery in Tokyo Bay Oct. 7 after completing scheduled maintenance, a company spokesperson told Platts Oct. 13.

Idemitsu suspended operations at the Keihin CDU March 22, initially planning to resume operations in July, the spokesperson said.

The spokesperson did not mention the reason for the prolonged maintenance.

In data news, Malaysia's production of kerosene rose 43.88% year over year and 15.2% month over month to 415,849 metric tons in August, preliminary data from the Department of Statistics showed. In the first eight months of 2026, kerosene output totaled 3.35 million mt, up 11.32% year over year.

Platts is part of S&P Global Energy.

Platts Asia & Middle East Jet Kero Daily Rationale & Exclusions

Jet Kero FOB Spore Cargo <PJABF00> assessment rationale:

The FOB Singapore Jet fuel/kerosene cargo assessment Oct. 14 was based on the adjusted relationship between the physical and swaps markets. The cash differential was down 14 cents/b on the day at Mean of Platts Singapore Jet fuel/kerosene assessment plus $3.82/b, as the balance October/November jet fuel/kerosene swap spread was down 28 cents/b day over day at plus $2.50/b.

Jet Kero FOB Arab Gulf Cargo <PJAAA00> assessment rationale:

The FOB Arab Gulf Jet Kero cargo assessment was derived as a freight netback from the FOB Singapore Jet Kero cargo assessment using the following input: FOB Singapore Jet Kero cargo assessment minus the cost of transporting a 55,000-mt clean cargo from a basket of ports in the Persian Gulf to Singapore.

Exclusions:

No market data was excluded from the Oct. 14, 2026 Singapore Jet fuel/kerosene Platts Market on Close assessment process.

Platts FOB Fujairah Jet Kero Rationale & Exclusions

Platts assessed FOB Fujairah jet fuel/kerosene Oct. 14 at a premium of $19/b to Mean of Platts Arab Gulf jet fuel/kerosene assessment, taking into consideration prices in the FOB Fujairah jet fuel/kerosene market as well as differentials for recent cargo trades heard in the Middle East.

The MOPAG jet fuel/kerosene strip was $157.18/b.

Exclusions:

No market data was excluded from the Oct. 14, 2026 Fujairah jet fuel/kerosene Market on Close assessment process.

Platts Asia and Middle Eastern Gasoil Daily Market Analysis

- Vietnam's Petrolimex buys 70,000 mt of gasoil for Oct, Nov delivery
- Indonesia's Pertamina seeks 50 ppm sulfur gasoil for Nov-Dec delivery

The Asian ultra-low sulfur gasoil market saw backwardation widen on Oct. 14 amid heightened Middle East tensions despite Russia potentially increasing diesel exports.

Russia's Deputy Prime Minister Alexander Novak said Oct. 12 said the country could increase its diesel exports to global markets to as much as 3.5 million metric tons/month by the end of 2026.

Russian diesel and gasoil exports averaged about 3.3 million mt/month over January-May, according to S&P Global Commodities at Sea, roughly in line with the volumes exported in 2025. However, exports

declined from June, reaching 479,000 mt in September, the lowest monthly volume on record, according to CAS data, which dates back to 2016.

Brokers pegged the front-month November-December Singapore gasoil swaps time spread at $4.05/barrel in midafternoon Asian trading Oct. 14, widening from $3.28/b at the 0830 GMT Asian close Oct. 13.

On physical cargoes, the benchmark Platts-assessed cash differential for FOB Singapore gasoil with a maximum sulfur content of 10 parts per million fell 33 cents/b day over day to $2.16/b at the 0830 GMT Asian close Oct. 13.

On tenders, Vietnam's Petrolimex purchased two 35,000 mt cargoes of 500 ppm sulfur gasoil for delivery over Oct. 26-30 and Nov. 4-8 at a premium of about $2/b to the Mean of Platts Singapore 500 ppm sulfur gasoil assessments, FOB.

Petrovietnam Oil did not award its tender seeking 48,000 cubic meters of 500 ppm sulfur gasoil for delivery over Nov. 15-21 to Nha Be or Mien Dong that closed on Oct. 12, with the company opting to source domestically instead.

Vietnam's 130,00 b/d Dung Quat refinery operated at an average capacity of 123% between January and September, higher than the 118% capacity in the same period last year, PetroVietnam said in a statement on Oct. 12.

Elsewhere, Indonesia's Pertamina issued a tender seeking up to 250,000 barrels of 50 ppm sulfur gasoil for delivery over Nov. 4-Dec. 1 to STS Balikpapan, Surabaya and Balongan. The tender closes o Oct. 14, with same-day validity.

In statistical news, Malaysia's combined oil product output rose 10.6% year over year to 3.64 million mt in August, preliminary data from the Department of Statistics showed Oct. 12, with kerosene, LPG, gasoil and naphtha production increasing.

The combined output of oil products in August also grew 7.1% month over month, led by kerosene, LPG and gasoil, the data showed.

Malaysia produced 1.84 million mt of gasoil in August 2026, up 8.22% from 1.70 million mt a year earlier and up 12.50% from 1.63 million mt in July, the data showed.

Platts Asia and Middle Eastern Gasoil Cargo Daily Rationale & Exclusions

Gasoil .001%S (10ppm) FOB Spore Cargo <AAOVC00> assessment rationale:

The benchmark FOB Singapore Gasoil 0.001% (10 ppm) cargo assessment Oct. 14 was based on the following inputs: An offer for a cargo loading over Nov. 3-7 at Mean of Platts Singapore Gasoil plus $1.78/barrel after normalizing for deemed pricing, and an offer for a cargo loading over Nov. 8-12 at MOPS Gasoil plus $1.74/b after normalizing for deemed pricing. The front, middle and back loading windows were assessed at MOPS plus $1.01/b, plus $1.73/b and plus $1.77/b, respectively.

Gasoil .05%S (500ppm) FOB Spore Cargo <AAFEX00> assessment rationale:

The FOB Singapore Gasoil 0.05% (500 ppm) cargo assessment Oct. 14 was based on the following input: A bid for a cargo loading over Nov. 5-9 at MOPS Gasoil minus $5.01/b after normalizing for deemed pricing. The front, middle and back loading windows were assessed at MOPS minus $5.48/b, minus $5.04/b and minus $4.82/b, respectively.

Gasoil FOB Spore Cargo <POABC00> assessment rationale:

The benchmark FOB Singapore Gasoil 0.001% (10 ppm) cargo assessment Oct. 14 was based on the following inputs: An offer for a cargo loading over Nov. 3-7 at MOPS Gasoil plus $1.78/b after normalizing for deemed pricing, and an offer for a cargo loading over Nov. 8-12 at MOPS Gasoil plus $1.74/b after normalizing for deemed pricing. The front, middle and back loading windows were assessed at MOPS plus $1.01/b, plus $1.73/b and plus $1.77/b, respectively.

Exclusions: No market data was excluded from the Oct. 14 Singapore Gasoil Market on Close assessment process.

Platts FOB Fujairah Gasoil Daily Rationale & Exclusions

Gasoil FOB Fujairah cargo <AFUJK00> assessment rationale:

The FOB Fujairah Gasoil assessment on Oct. 14 was assessed at a premium of $19.50/barrel to Mean of Platts Arab Gulf gasoil assessment, taking into consideration prices in the FOB Fujairah gasoil market as well as differentials for recent cargo trades heard in the Middle East. The MOPAG Gasoil Strip was $154.73/b.

Gasoil 500 ppm FOB Fujairah cargo <AFUJN00> assessment rationale:

The FOB Fujairah 500 ppm Gasoil assessment on Oct. 14 was assessed at a premium of $17.32/b to MOPAG gasoil assessment, taking into consideration prices in the FOB Fujairah gasoil market as well as differentials for recent cargo trades heard in the Middle East. The MOPAG Gasoil Strip was $154.73/b.

Exclusions: No market data was excluded from the Oct. 14 Fujairah Gasoil Market on Close assessment process.

Platts Asia and Middle Eastern Gasoil Cargo Bids, Offers, Trades

Bids: Gasoil 10ppm: FOB Straits: Trafigura bids MOPS +0.00 Oct 29-Nov 2 180kb (Deemed pricing 5 days after B/L) INCO or MOPS +1.00 Nov 4-8 180kb (Deemed pricing 5 days after B/L) INCO or MOPS +0.00 Nov 9-13 180kb (Deemed pricing 5 days after B/L) INCO; Gasoil 500ppm: FOB Straits: Vitol bids MOPS -4.88 Nov 5-9 150kb (Deemed pricing Nov 5-12) INCO

Trades: No trades reported

This assessment commentary applies to the following market data codes: <AAOVC00> <AAFEX00> <AACUE00> <POABC00> <AAFEZ00>

Platts Asia and Middle Eastern Gasoil FOB Cargo Daily Rationale & Exclusions

Gasoil .25%S (2500ppm) FOB Spore Cargo <AACUE00> assessment rationale:

The FOB Singapore Gasoil 0.25% (2,500 ppm) cargo assessment Oct. 13 was assessed 3 cents/barrel lower day over day at Mean of Platts Singapore Gasoil minus $10.32/b, based on the movement in the FOB Singapore Gasoil 0.05% (500 ppm) cargo assessment.

Gasoil .05% (500ppm) FOB Arab Gulf Cargo <AAFEZ00> assessment rationale:

The FOB Arab Gulf Gasoil 0.05% (500 ppm) cargo assessment was derived as a freight netback from the FOB Singapore Gasoil 0.001% (10 ppm) cargo assessment using the following inputs: FOB Singapore Gasoil 0.001% (10 ppm) cargo assessment minus the cost of transporting a 55,000-mt clean cargo from a basket of ports in the Persian Gulf to Singapore, and taking into account the cash differential between the FOB Arab Gulf 10 ppm and 500 ppm assessments.

Gasoil FOB Arab Gulf Cargo <POAAT00> assessment rationale:

The FOB Arab Gulf Gasoil 0.001% (10 ppm) cargo assessment was derived as a freight netback from the FOB Singapore Gasoil 0.001% (10 ppm) cargo assessment using the following input: FOB Singapore Gasoil 0.001% (10 ppm) cargo assessment minus the cost of transporting a 55,000-mt clean cargo from a basket of ports in the Persian Gulf to Singapore.

Exclusions: No market data was excluded from the Oct. 14 Singapore Gasoil Market on Close assessment process.

Platts Asia and Middle East Fuel Oil Daily Market Analysis

- Singapore fuel oil swap spreads mixed
- Surge in freight rates likely to impact cargo flows

The Singapore fuel oil complex was mixed midweek as high sulfur fuel oil continued to see more support relative to the lower sulfur grade, as the world's largest bunkering hub remained in short supply.

Sharply higher tanker freight rates could further limit the arbitrage window for fuel oil cargoes into Singapore, market sources said. The cost of moving cargoes has been rising since July this year and has surged to record highs in recent weeks. On Oct. 13, Platts assessed the Arab Gulf-Singapore freight rate for an 80,000-kt cargo at $178.37/metric ton.

Singapore may see arrivals dip compared with September, should freight rates hold at elevated levels, said market sources.

The spread between the balance October and November for Singapore 380 CST high sulfur fuel oil swaps narrowed slightly day over day to be assessed at a backwardation of $51.05/mt at Asian close on Oct. 13, and widened in midafternoon trade to $53.25/mt on Oct. 14.

As for the low sulfur fuel oil grade, the backwardation crunched in slightly at 3 pm Singapore time on Oct. 14 with the FOB Singapore 0.5% sulfur marine fuel balance-October and November intermonth swap spread at $27/mt, compared with Oct. 13's close at $27.50/mt.

Downward pressure remained from China's latest round of export quotas for LSFO, which was likely to lead to more competitive prices for the delivered market. The quotas also meant that China would be less reliant on imports from Singapore, although the immediate impact would be limited as current freight rates also made flows out of the city-state more expensive, market sources said.

Meanwhile, Malaysia's output of fuel oil in August 2026 slipped 0.16% from the previous month to 189,976 mt, preliminary data from the Department of Statistics showed. The fuel oil production was 6.64% lower than the same time last year, the data showed. Combined oil product output rose 10.6% year over year to 3.64 million mt, with kerosene, LPG, gasoil and naphtha production increasing, according to the data.

In other news, Singapore launched the Singapore Standard 730:2026 for bunker fuel sampling and TR 155:2026 for testing polymers in residual marine fuels, the Maritime and Port Authority of Singapore and Enterprise Singapore said Oct. 14.

SS 730 stands as a code of practice for custody transfer sampling of ambient liquid marine fuels. The standard covers Class F marine fuels, including fuels derived from petroleum, synthetic and renewable sources, as well as methanol. It sets out common

sampling procedures and safety requirements for bunker suppliers, bunker craft operators, bunker buyers and bunker surveyors to improve consistency in bunker delivery and fuel quality assurance, the authorities said.

TR 155 establishes a common method for testing polystyrene, polypropylene and polymethyl methacrylate in residual-based marine fuels, including detection limits. The MPA and Enterprise Singapore said the reference would improve the consistency of polymer identification and strengthen fuel quality assurance.

Platts US West Coast Light End Daily Commentary

- Los Angeles CARBOB differential climbs 6 cents
- San Francisco pricing holds steady at 48 cents/gal
- Portland gasoline price drops 13 cents on day

Differentials for Los Angeles CARBOB rebounded on Oct. 14, while Portland gasoline fell significantly.

Platts assessed Los Angeles CARBOB up 6 cents to NYMEX November RBOB futures plus 44 cents/gallon, amid a trade heard done at futures plus 47 cents/gallon and a lower offer heard at futures plus 45 cents/gal.

In San Francisco, the differential remained stable at plus 48 cents/gal, as market activity was relatively quiet on the day.

The premium/regular regrades for Los Angeles and San Francisco both narrowed by 1 cent to 12 cents.

Farther north, Portland differentials fell 13 cents to futures plus 4 cents/gal amid a trade heard done at that level before the market close. The premium/regular regrade also narrowed by 6 cents to 12 cents, bringing the premium grade down 19 cents to futures plus 16 cents/gal.

Platts Middle East Sour Crude Daily Market Analysis

- Close to 20 mil barrels awarded in UAE crude tender: traders
- Middle East crude differential drops to fresh 2-month lows

Middle East crude traders were digesting the results of a recently awarded UAE crude sell tender Oct. 14, through which close to 20 million barrels were heard to have been sold, according to market participants.

In the tender, at least 8 million barrels of Upper Zakum and 2 million barrels of Das Blend were heard sold to North Asian refiners that included those in China, Taiwan and Japan. Prices on a delivered basis were heard at premiums in the low- to mid-teens to Platts Dubai, three Asia-based sources said.

Another 5 million barrels of Upper Zakum and 3 million barrels of Das Blend were heard sold to four separate Indian refiners, with prices on a delivered basis heard at premiums in the high singles to Platts Dubai, according to three Asia-based sources.

Some of the aforementioned cargoes were also heard to have transacted on an STS basis — likely across the Fujairah-Sohar range — at discounts of around $4-$5/b to Platts Dubai for Upper Zakum, and around parity to Platts Dubai for Das Blend.

Some cargoes could also have been sold on an ICE Brent crude futures basis, though further details were unclear, the same sources said.

Sentiment across the broader Middle East crude complex continued to weaken in the Oct. 14 session, with the Platts Dubai cash-futures spread weakening for a fourth day to a fresh two-month low premium of $7.35/b.

Trade sources held mixed views on supply-demand balances within Asia. While high freight rates have impeded the flow of arbitrage crudes from the West and Iranian crude supply has tightened, ongoing spot offers from various Middle East producers, as well as the continued successful transit of tankers through the Strait of Hormuz, have helped to prevent any severe shortage within the region.

Sources also pointed to ample sales of Basrah crude to Chinese refiners in recent weeks as helping partially offset the loss of Iranian crude supply, particularly among the country's independent refiners.

“They can buy Basrah. It's cheap. Too much cargoes are not cleared,” an independent refinery source said, adding that offers for December ESPO Blend cargoes have potentially fallen below a $20/b premium to ICE Brent on a DES Shandong basis.

Platts earlier reported imports of Iranian crude by China's independent refineries hitting a four-year low in September, with volumes likely to trend lower in October due to the ongoing US blockade of the Strait of Hormuz.

Basrah Medium and Heavy crude parcels, meanwhile, were heard to have been sold in recent weeks to around eight independent refiners, at premiums of about $17-$18/b to ICE Brent futures on a delivered Shandong basis for Basrah Medium, and a premium of around $12/b to ICE Brent on the same basis for Basrah Heavy.

Platts Mideast Sour Crude Daily Rationales & Exclusions

Dubai Mo01 <PCAAT00> assessment rationale: The December cash Dubai assessment Oct. 14 took into consideration bids for cash Dubai partials at 109.09/b that traded toward the end of the Platts Market on

This assessment commentary applies to the following market data codes: Dubai M1 <PCAAT00>, Oman M1 <PCABS00>

Platts Asia Pacific Sweet Crude Daily Market Analysis

- Dec-loading Ichthys Field condensate offered
- Taiwan's CPC seeks sweet crude for Jan arrival

The Asia-Pacific regional complex saw an increase in market activity led by tender issuances across the crude and condensate complex Oct. 14.

In the regional condensate complex, France's TotalEnergies was heard to have offered its Australian Ichthys Field condensate cargo scheduled to load over Dec. 11-15 via a tender that closed Oct. 14, according to several trade sources.

The Platts-assessed second-month gasoline and naphtha swap cracks against Dubai crude swaps averaged $19.11/barrel and minus $6.05/b, respectively, as of the Oct. 14 Asian close, compared to averages of $23.04/b and minus $1.97/b in September.

In the delivered crude complex, Taiwan's CPC was seen seeking various sweet crude grades for January arrival via its monthly import tender that closes Oct. 15, with next-day validity.

In the previous trading cycle, the refiner was last heard to have purchased four Aframax cargoes of US WTI Midland crude scheduled for December arrival from Gunvor at premiums of about $27/b against Platts Dated Brent crude assessments, CFR Taiwan.

CPC was also heard to have purchased two Aframax cargoes of Argentina's Medanito crude scheduled for December arrival, each from PetroChina and TotalEnergies, at premiums in the $22s/b against the same benchmark.

Meanwhile, the International Energy Agency cut its forecasts for global oil demand this year and slashed its estimate for next year's demand recovery, Oct. 14, warning that diesel supplies will remain tight well into next year as the Middle East war continues to hit supplies and fuels pump prices.

World oil demand is now set to decline by an average of 2.6 million barrels/day in 2026 as the impact of the war in the Middle East weighs on markets and demand growth is not expected to return to positive territory until March 2027, the IEA said in its latest monthly Oil Market Report. The agency kept its average 2026 world oil demand at 102.4 million b/d but cut 2027 demand to 104.4 million b/d from 105 million b/d in its September report, leaving 2027 consumption about 620,000 b/d, or 0.6%, below 2025 levels.

The IEA forecast global demand falling by 2.5 million b/d year over year in the fourth quarter of 2026, following contractions of 5 million b/d in the second quarter and 3.7 million b/d in the third quarter. In September, the IEA had forecast a 2.5 million b/d decline in global oil demand in 2026 and a 2.6 million b/d rebound in 2027.

Platts Asia and Middle East Weekly Bitumen Commentary

- Singapore bitumen prices climb on tight supply
- Indian CFR prices surge

The Asian bitumen market remained firm in the week to Oct. 14, with Singapore and South Korean prices extending gains amid tight regional availability, while Indian import values rose as firmer Iranian indications and elevated freight costs from the Middle East supported CFR prices.

In Singapore, Platts assessed FOB PEN 60-70 bitumen at $810/metric ton Oct. 14, up $15/mt week over week. Offers were heard at $810-$820/mt FOB Singapore during the week, reflecting continued tight spot availability. Limited regional supply continued to support market sentiment, with buyers monitoring alternative sources of material from South China amid elevated Singapore prices.

In South Korea, Platts assessed FOB PEN 60-80 bitumen at $790/mt Oct. 14, up $5/mt week over week. According to S&P Global Commodities at Sea data, the Janesia Asphalt IV, with 4,318 mt deadweight, loaded at Ulsan on Oct. 8 for Sendai, Japan. The Kan Wo, with 6,484 mt deadweight, loaded at Yeosu Oct. 8 for Lanshan, China, while the Hua Hang He Chang loaded a 5,988-mt cargo at Yeosu Oct. 9 for Chiba, Japan. Market participants continued to monitor potential refinery tenders and available spot cargoes amid limited regional supply.

Hainan and South China continued to provide alternative sources of supply for regional buyers amid tight availability in Singapore and South Korea. According to CAS data, the JS Onsan loaded a 5,673-mt cargo at Hainan Oct. 10 for Ulsan, South Korea. The Bitumen Shouri, with 3,630 mt deadweight, loaded at Hainan Oct. 12 for Palembang, Indonesia, while the New Horizon, with 3,736 mt deadweight, loaded at Hainan Oct. 12 for Indonesia. Continued cargo movements from Hainan highlighted the availability of alternative regional supply as buyers monitored elevated prices from traditional export origins.

In India, Platts assessed CFR West Coast India VG30 and VG40 at $595/mt and $600/mt, respectively, both up $45/mt week over week. CFR East Coast India VG30 and VG40 were assessed at $635/mt and $640/mt, respectively, also up $45/mt week over week. Indications for West Coast India VG30/VG40 were heard at $600-$610/mt CFR during the week, while FOB Iran VG30/VG40 bitumen was heard at $360/mt, compared with indications of $300-$320/mt the previous week.

Freight from the Middle East to West Coast India was heard at $250/mt and $350/mt on separate indications. Higher Iranian FOB indications and elevated freight costs supported Indian import values, as buyers are preparing for the peak demand season.

In the Middle East, Platts assessed FOB Bahrain unchanged week over week at $550/mt.

Platts is part of S&P Global Energy.

Platts Asia and Middle East Weekly Group I Base Oils Commentary

- Asian Group I supply tightens
- Indian demand rises on seasonal factors

The Asian Group I base oils market saw activity remain subdued in the week ended Oct. 14, although sentiment firmed slightly as availability tightened.

Supply was limited, with Thai producers largely absent from the spot market, multiple Asia-based market participants said.

Several Asia-based sources said the reduced availability has raised concerns that Group I prices could increase in the coming weeks.

Platts assessed FOB Asia SN150 and SN500 at $1,355/metric ton and $1,370/mt, respectively, on Oct. 14, both up $5/mt week over week. Bright Stock was assessed unchanged at $1,560/mt over the same period.

Inquiry levels from India picked up during the week amid increased seasonal demand, four Asia-based traders said.

Indian Group I inventory levels drew mixed commentary: some market participants said stocks were sufficient to cover near-term consumption, while others said domestic supply was curtailed because of elevated feedstock costs and higher dirty tanker freight rates.

Indicative CFR India values were heard at $1,370-$1,460/mt for SN150, $1,430-$1,500/mt for SN500 and $1,600-$1,660/mt for Bright Stock.

Platts assessed CFR India SN150 and SN500 at $1,400/mt and $1,440/mt, respectively, on Oct. 14, both up $30/mt week over week. Bright Stock was assessed unchanged at $1,660/mt over the same period.

Platts is part of S&P Global Energy.

Platts Asia and Middle East Weekly Group II Base Oils Commentary

- India buying rises as monsoon ends
- 70N prices climb on scant supplies

The Asian Group II base oils market saw increased buying interest from India in the week ended Oct. 14, as the end of the monsoon season and inventory drawdowns supported demand.

On the supply side, an Asian supplier said feedstock inventories were expected to remain stable through December, supported by diversification of sourcing, including supplies from Latin America.

© 2026 by S&P Global Inc. All rights reserved.

©2026 S&P Global Inc. Any unauthorized use of this copyrighted material constitutes infringement of our intellectual property and will subject you to possible legal action.

Demand for 70N and 500N/600N remained steady during the week, while availability of both grades was limited, four Asia-based sources said. By contrast, demand for 150N softened, with supply more readily available.

November-loading offers were heard in the low $1,300s/mt to $1,400/mt for 70N, $1,500-$1,550/mt for 150N and $1,570-$1,580/mt for 500N/600N, all on an FOB Asia basis.

Platts assessed FOB Asia 70N at $1,360/mt on Oct. 14, up $30/mt week over week, while 150N fell $30/mt to $1,540/mt, and 500N was down $20/mt at $1,580/mt.

In India, CFR price levels for 70N were indicated at $1,450-$1,550/mt, with the range strengthening during the week amid limited availability. Indicative values for 150N were heard at $1,550-$1,620/mt, while 500N/600N values were heard at $1,640-$1,680/mt.

Platts assessed CFR India 70N at $1,450/mt on Oct. 14, up $70/mt week over week, while 150N was unchanged at $1,570/mt, and 500N rose $10/mt to $1,660/mt.

Platts is part of S&P Global Energy.

Platts Asia and Middle East Weekly Group III Base Oils Commentary

- Asian Group III supply remains tight
- CFR India up on thin availability, firmer indications

Supplies in the Asian Group III base oils market remained tight during the week ended Oct. 14.

Indicative FOB Asia values for products carrying partial OEM approvals were heard at about $3,600-$3,650/metric ton for 4CST and 6CST.

For fully approved grades, prices were heard at about $4,500/mt on a CFR basis for buyers in the Middle East, up from levels of about $4,300/mt heard in mid-September, while selling indications on FOB South Korea basis for the 4CST and 6CST remained above $4,000/mt.

Platts assessed fully OEM-approved Group III grades on an FOB South Korea basis as unchanged in the week to Oct. 14, at $4,100/mt for 4CST, $4,130/mt for 6CST and $3,600/mt for 8CST.

The Platts-assessed FOB Asia Group III grades with partial OEM approvals were also steady in the same period, at $3,650/mt for 4CST, $3,625/mt for 6CST and $3,325/mt for 8CST.

On a CFR India basis, indicative values strengthened by at least $100/mt across all grades in the week to Oct. 14 at $3,300-$3,500/mt for 4CST, $3,200-$3,500/mt for 6CST and $3,000-$3,100/mt for 8CST.

Buying indications were largely in the low-$3,000s/mt on a CFR India basis, although sellers' offers remained above those levels, an India-based blender said, adding that Middle Eastern-origin grades had to be sourced in flexibags despite high logistics costs for formulations requiring OEM-approved products.

Platts assessed CFR India 4CST up $180/mt in the week to Oct. 14 at $3,100/mt, 6CST up $90/mt at $3,050/mt and 8CST up $155/mt at $3,000/mt.

Platts is part of S&P Global Energy.

Platts includes Hydradd C9000 cetane improver in Singapore gasoil

Platts, part of S&P Global Energy, has begun to reflect Hydradd C9000 cetane improver by Scandinavian Oil Services Oct. 8, 2026, following a review of recognized additives contained in the FOB Singapore gasoil assessment process.

Platts understands that Hydradd C9000 cetane improver is a relabel of Cetpro Micet's 2-Ethyl Hexyl Nitrate, an additive which has been reflected in the FOB Singapore gasoil assessment process since Jan. 22, 2015.

For the full list of previously identified additives, please review the Asia Pacific and Middle East Refined Oil Products Specifications Guide.

The list of Platts gasoil recognized additives is intended to provide clarity to market participants regarding which additives are generally considered merchantable and accepted for cargoes delivered through the Platts Market on Close assessment process in Singapore. Platts does not align its FOB Singapore additives acceptance to any particular importing country.

Please send all comments or questions to **asia_oilproducts@spglobal.com** and **pricegroup@spglobal.com.**

Platts reviews all methodologies annually to ensure they continue to reflect the physical markets under assessment, and regularly assesses the relevance of methodologies through continuous contact with the market.

Feedback on methodologies is always welcomed by Platts.

Please send all feedback, comments, or questions to oilgroup@spglobal.com and pricegroup@spglobal.com.

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing.

Platts will consider all comments received and will make comments not marked as confidential available upon request.

Singapore Deepavali publishing schedule for Platts Asia Oil

S&P Global Energy's office in Singapore will be closed on Nov. 9, 2026, and there will be no oil publications or assessments from Singapore on the same day, as it is a public holiday for Deepavali.

Additionally, Platts in Asia will close its Market on Close assessment process early on Nov. 6, and all assessments will be based on 12:30 pm Singapore time (0430 GMT).

The normal Singapore publishing schedule will resume on Nov. 10.

For full details of Platts' publishing schedule and affected services, refer to http://www.platts.com/HolidayHome.

For queries, please contact support.energy@spglobal.com.

Platts to launch daily FOB Middle East bitumen assessments from Nov. 2

Platts, part of S&P Global Energy, will launch daily VG30 and VG40 bitumen spot assessments for FOB Middle East, effective Nov. 2, 2026.

The new assessments will complement Platts' existing daily and weekly bitumen assessments, providing greater price transparency and information in the waterborne trade for the product in the Asia-Pacific and Middle East markets.

Platts will launch two new daily outright assessments and their respective monthly averages. These assessments will reflect bulk viscosity grade 30 and VG40 grade bitumen, as per IS 73:2013 specifications, loading 10-30 days forward from the date of publication in the Middle East.

Assessment	Quantity	Laycan	UoM
FOB Middle East Bitumen VG30	2,500-10,000 mt, bulk	10-30 days forward	$/mt
FOB Middle East Bitumen VG40	2,500-10,000 mt, bulk	10-30 days forward	$/mt

Pricing information for material with other specifications, such as PEN 60/70, may be considered for the assessments, normalized to the proposed standard.

The assessments will reflect market value at the close of Asian trading at 4:30 pm Singapore time and follow the Singapore publication schedule. Bids, offers and trades reported throughout the day may be considered in the assessment process, with values normalized to the market close at 4:30 pm Singapore time.

This follows a proposal published Sept. 14 and available here.

Please send any questions, comments or feedback to asia_products@spglobal.com, with a copy to pricegroup@spglobal.com.

For written comments, please provide a clear indication if they are not intended for publication by Platts for public viewing.

Platts will consider all comments received and will make those not marked as confidential available upon request.

Platts proposes to amend rollover date of Asian Dated Brent Strip at London close

Platts, part of S&P Global Energy, is proposing to amend the rollover date of its Asian Dated Brent Strip at London close assessment to the first publication day of the month, from Dec. 1, 2026.

The proposed change, which follows Platts review of historical data sets, would align the ADB Strip at London close assessment with the current rollover date of its ADB Strip at Asia close assessment.

Currently, this assessment, which reflects the forward value of Dated Brent two months ahead of the date of publication at the 4:30 pm London close, rolls over on the 9th of the month.

The assessments affected by this change appear in Crude Oil Marketwire, Asia Pacific/Arab Gulf Marketscan, Oilgram Price Report, Platts Global Alert/Platts Crude Oil Alert pages 2206, 2213, 2215, 2217, 2219, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2280, 2281, 2558, 2559, and under their price database codes as below:

Platts corrects Jan 2, Jan 5 Singapore-Australia 35kt gasoline netback

Platts, part of S&P Global Energy, has corrected the Jan. 2 Singapore-Australia 35kt gasoline netback and Jan. 5 Singapore-Australia 35kt gasoline netback assessments.

They should read as follows:

Date of assessment Name of assessment Mid-PointSymbol

Jan. 2, 2026 Clean Singapore-Australia 35kt Gasoline $/b5.11AAPOE00

Jan. 5, 2026 Clean Singapore-Australia 35kt Gasoline $/b5.13AAPOE00

These assessments appear in the Platts Asia-Pacific/Arab Gulf Marketscan, PGA0902, SHP352, PGT2910

Platts to update 2026 freight netbacks for Asia/AG oil product assessments

Platts, part of S&P Global Energy, will update the basis rates used in its calculation of various freight netback assessments in Asia and the Middle East, in line with flat rates published by the Worldscale Association, effective Jan. 2, 2026.

The basis rate used to calculate FOB Arab Gulf unleaded gasoline assessments is $12.77/metric ton for Medium Range and Long Range 1 vessels, with a fixed differential port charge of an additional $1.10/mt. The basis rates used to calculate C+F Japan and C+F Australia unleaded gasoline assessments are the Worldscale 2026 flat rates between the relevant ports, as published by the Worldscale Association.

The basis rate used to calculate the FOB Arab Gulf naphtha netback is $24.81/mt for Long Range 1 and Long Range 2 vessels, and fixed differential port charges are an additional 18 cents/mt. The basis rate used to calculate FOB Singapore naphtha is the Worldscale 2026 flat rate between the relevant ports.

The basis rate used to calculate FOB Arab Gulf gasoil and jet fuel/kerosene assessments is $13.67/mt for Long Range 1 and Long Range 2 vessels, with a fixed differential port charge of an additional 14 cents/mt. The basis rate for C+F Australia gasoil and jet fuel/kerosene is the Worldscale 2026 flat rate between the relevant ports.

The basis rates used to calculate the netback FOB Arab Gulf 180 CST and 380 CST fuel oil assessments are the Worldscale 2026 flat rates between the relevant ports.

The actual freight applied to derive the netback or C+F assessments fluctuates daily based on changes to Platts freight assessments, as published in Platts Dirty Tankerwire and Clean Tankerwire, applied against the respective 2026 basis rates. Any additional port charges and/or fixed differentials are then added separately.

For further details on the Asia oil products netback methodology, please refer to the Asia Pacific and Middle East Refined Oil Products Guide: refined-products-asia-pacific-middle-east-specifications.pdf .

Please send any further comments and questions to asia_products@spglobal.com and pricegroup@spglobal.com.

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing. Platts will consider all comments received and will make comments not marked as confidential available upon request.
