Market Commentary

Platts Latin American Crude Daily Commentary

- Guyanese differentials drop $3.45/b vs Dated Brent strip
- Guyana sets December record with 34 cargoes
- Brazilian grades fall $2.70/b on softening landing levels

Guyanese and Brazilian differentials continue to decline Oct. 14 amid a punitive freight market, while

Guyana pushes toward record output in December, with 34 cargoes in the loading program.

Guyanese differentials fell $3.45/barrel against the Latin American Dated Brent strip, as November loadings of Unity Gold and Payara Gold were heard to have traded at weaker FOB equivalents into Europe.

Platts, part of S&P Global Energy, assessed Unity Gold and Payara Gold at discounts of $25/b and $25.45/b, respectively, to the Dated Brent strip.

"Ultimately, producers have got to keep their barrels moving and retain market share to avoid shutting in production," said a trader familiar with the grades, explaining why Guyanese differentials have been struggling to find a floor.

Meanwhile, Guyana's Uaru Gold crude, expected to hit the market in December, will be another medium-sweet grade with a quality most similar to that of Guyana's flagship Liza crude, according to a preliminary assay seen by Platts Oct. 14.

Platts assessed Liza at a $26/b discount to the Latin American strip, and another Europe-based trader said he suspected Uaru would be priced near 25 cents/b to 50 cents/b below the other Guyanese grades as it hits the market.

Guyana is set to load a record 34 million barrels of crude across 34 cargoes, each carrying 1 million barrels, in December, including four cargoes of Uaru Gold crude, according to a copy of the producers' provisional loading schedule seen by Platts Oct. 14.

In Brazil, Platts assessed both Tupi and Mero $2.70/b lower against the Latin American Dated Brent strip, at discounts of $24.95/b and $20.10/b, respectively. December-arrival barrels of Tupi were heard to have traded at about an equivalent to November Dated Brent plus "low $10s"/b. Simultaneously, the Brazil-East VLCC freight run continues its decline to 700 worldscale points, or about $36.39/b, as of Oct. 14.

Platts Latin American Middle Distillate Daily Commentary

- Latin American fuel prices show mixed movements
- Venezuela restarts Cardon refinery operations

Refined product prices in Latin America mostly rose on Oct. 14 after crude futures hit a three-week high amid fresh attacks in the Middle East clouding supply outlook.

Platts assessed the price of gasoline DAP Lazaro Cardenas in Mexico at $133.61/barrel, up $2.29/b, or almost 1.75% compared with the prior trading day. Platts also assessed the value of ULSD DAP Tuxpan at $194.29/b, down $2.07/b, or a little more than 1%.

In Bolivia, the import parity price of gasoline in Santa Cruz moderately declined by 52 cents/b, or 0.3%, to $175.38/b, while the import parity price of ULSD in La Paz finished at $259.46/b, up $3.41/b, or just over 1.3%.

Platts assessed the value of ULSD DAP Argentina at $207.90/b, up only 66 cents/b, or around 0.3%.

In Ecuador, Platts assessed the price of 95 RON gasoline DAP at $141.47/b, up 49 cents/b, or only 0.35%, while the assessed value of ULSD DAP rose 83 cents/b, or 0.4%, to $204.40/b.

In Venezuela, state-run PDVSA restarted crude processing at its Cardon refinery after a natural gas line explosion halted operations on Oct. 6. The refinery was operating at a rate of 150,000 barrels/day, or 48.4% of its capacity, as of Oct. 9, according to the PDVSA technical report reviewed by Platts. Three of the four distillers were in service.

In the wider crude market, NYMEX November WTI settled 95 cents/barrel higher at $95.09/b, putting the front-month contract at the highest level since Sept. 21, and ICE December Brent climbed 37 cents/b to $106.06/b.

In a statement to Reuters on Oct. 14, Iranian officials said the country was actively targeting ships trying to cross the Strait of Hormuz after two vessels were reportedly struck during an attempted transit on Oct. 13.

Platts Latin American Bunker Daily Commentary

- Spot VLSFO rises $15/mt in Cartagena
- Bunker pricing rises in Ecuador and Chile
- Other Latin ports see mixed price movements

Latin America spot bunker prices were mixed Oct. 14, moving with futures and rising with lagged adjustments.

Platts assessed front-month Brent at $106.08/barrel, up 50 cents/b from the previous session. NYMEX ULSD front-month futures contract slid 0.70 cent/gallon to be assessed at $4.9274/gal, pushing down the Latin American MGO markets.

Spot marine fuel 0.5%S markets followed the Brent trend, with Cartagena, Colombia, showing the largest rise, up $15/metric ton to $852/mt, tracking sources' indications.

In most Latin American ports, marine fuel 0.5%S gained $1 to $6/mt, day on day.

Platts, part of S&P Global Energy, assessed delivered marine gasoil in Guayaquil, Ecuador, up $33/mt, to $1,846/mt delivered, marking the region's biggest day-on-day rise as suppliers updated their offerings.

In Valparaiso, Chile, Platts assessed MGO $8/mt up at $1,903/mt supported by Ecuador's hike, and suppliers' indications.

Delivered MGO fell $1 to $6/mt in the rest of the key Latin American ports.

Platts Brazil Diesel Daily Commentary

- Platts Brazil ULSD assessments hold steady
- Inland South/Southeast hubs show active trading
- Import cargoes gain premium before elections

Brazilian ultra low sulfur diesel prices were unchanged Oct. 14, with market participants confirming fresh trades at current price levels and liquidity remaining concentrated in inland markets.

According to market participants, current ULSD supply remains broadly aligned with demand, limiting price adjustments despite ongoing uncertainty surrounding the government's new subsidy framework. Sources said that the market is largely in a holding pattern as buyers and sellers await further details on the subsidy program. With supply-demand fundamentals viewed as balanced, current expectations are for prices to remain broadly stable in the near term, barring significant moves in international ULSD markets, exchange rates, or government pricing policy.

Sources said that liquidity remains concentrated in the country's South and Southeast regions, particularly in the inland hubs, with offers and buying interest being reported ranging from premium 1,200 reais/cubic meter to 1,300 reais/cubic meter over Petrobras' posted price, highlighting Araucária.

Still, in the region, Platts FCA Paranagua was assessed at 4,502.30 reais/cubic meter, steady, and

a premium of 1,200 reais/cubic meter over Petrobras' posted price. The assessment considered a fresh trade reported early on the day at 1,200 reais/cubic meter over Petrobras' posted price, and participants reported prices are considered consolidated at the current level once demand is regular amid well-supplied stocks. Platts FCA Santos was assessed unchanged at 4,531.10 reais/cubic meter, and a premium of 1,200 reais/cubic over Petrobras' posted price.

Meanwhile, in the North and Northeast, Platts assessments were unchanged from the previous session as buyers and sellers remained cautious amid uncertainty over the new diesel subsidy framework. Market participants described liquidity as subdued, with a wide gap between prevailing offer indications and downstream selling prices, which continues to constrain fresh trades. Platts assessed FCA Itaqui at 5,243 reais/cubic meter and FCA Suape at 5,257.40 reais/cubic meter, steady on the day, and both locations reflecting a premium of 2,090 reais/cubic meter over Petrobras' posted price.

The diesel cargo market is firmer as buyers seek to internalize imported volumes ahead of the second round of the Brazilian presidential elections. Market participants anticipate that government subsidies may be reduced after the vote.

Market sources said that prompt-delivery cargoes are commanding premiums, supported by subsidy incentives. Later in the session, an offer was reported for a full cargo delivering into Itaqui in the Oct. 25-30 window, priced at a 2 cents/gal discount to ULSD November futures.

In reported market activity, a part-cargo sale was heard at a 20 cents/gal premium to ULSD November futures for delivery into Paranaguá. Some sources described the level as elevated, but attributed it to the timing of the vessel's arrival to take advantage of the new subsidy.

NYMEX November Heating Oil ULSD contracts settled at $4.9274/gal, a decrease of 0.700 cent from Oct. 13. The dollar-to-real exchange rate was quoted higher, at Real 5.0535/$1 at 4:30 pm Sao Paulo time.

Platts is part of S&P Global Energy.

Platts Brazil Gasoline Daily Commentary

- Freight rates surge after Middle East attacks
- ARA-US Gulf price spread nearly disappears
- Domestic market stays stable with low activity

Brazilian gasoline replacement costs increased Oct. 14 as freight rates surged following attacks in the Middle East.

Recent market discussions highlighted shifts in Brazil's gasoline pricing dynamics. Initially, FOB gasoline was quoted at discounts of 60 cents/gallon and 58 cents/gal, later moving to discounts of about 45 cents/gal.

According to market participants, landed prices for October arrivals settled at discounts of 28-30 cents/gal. Although US Gulf Coast gasoline appeared more competitive at first, higher freight rates -currently 23-25 cents/gal from the USGC versus 17-20 cents/gal from Amsterdam-Rotterdam-Antwerp - have eroded this advantage.

"We are seeing USGC gasoline today at FOB minus 52 cents/gal, which also gives a landed discount of 28-30 cents/gal because USGC-Brazil freight is more expensive," a market participant said, while a second player noted that "gasoline in the US appeared more competitive, but freight eats up this competitiveness and it arrives practically equal to ARA."

The previously considered spread between ARA and USGC gasoline has almost disappeared, with the freight differential now being the main driver behind higher DAP Brazil gasoline indications. This convergence showed how freight volatility and market rotation affect import economics, making DAP values more sensitive to logistics than outright price differences.

Platts, part of S&P Global Energy, assessed DAP Suape for all-origin gasoline - dominated by ARA barrels - at a 43.25-cent/gal discount to November RBOB futures and US-origin Oct. 13.

In the domestic market, prices remained stable amid limited trading activity in the Northeast.

In the region, a trade of 200 cubic meters was reported in Suape at a 903-reais premium over Petrobras' ETM Ipojuca, while an offer was reported at a 910-reais premium to the same reference.

Distributors said the market remained well supplied, with the limited volumes sold mainly to free up tank space ahead of incoming ship arrivals.

Platts, part of S&P Global Energy, assessed gasoline FCA Suape at 3,847.60 reais/cubic meter and FCA Itaqui at 3,830.30 reais/cubic meter, both at a premium of 900 reais to Petrobras' ETM Ipojuca and ETM São Luís references.

In the Center-South, offers were reported at inland hubs, while activity at the ports remained illiquid. In Senador Canedo, Goiás, an offer was reported at a 300-reais premium to Petrobras' EXA Senador Canedo, unchanged from the previous session. In Araucária, an offer was reported at a 600-real premium to the same base reference.

Platts assessed gasoline FCA Santos at 3,760.80 reais/cubic meter and FCA Paranaguá at 3,720.90 reais/cubic meter, both at a 700-reais premium to Petrobras' EXA Paulínia and EXA Araucária postings.

NYMEX November RBOB contracts settled at $3.2595/gal, up 0.94 cents from Oct. 13. The US dollar-to-real exchange rate rose to 5.035 reais/$1.

Platts Latin American Dated Brent Strip Rationale

Platts Latin American Dated Brent strip <AAXBR00> assessment rationale:

This assessment reflects the value of forward Dated Brent at the US close for the loading period reflected in the Latin American crude market.

Dated Brent-related differentials for all Latin American crudes reflect values relative to the value of forward Dated Brent that prevails at the time of loading. As an example, on July 1, Platts assesses the value of Latin American crudes loading in the month of August. Therefore, the Dated Brent related basis for Platts Latin American crude assessments on July 1 reflects the average of prevailing Dated Brent swaps for Aug. 1-31.

Platts is part of S&P Global Energy.

Platts Liza FOB Guyana Daily Rationale & Exclusions

Liza FOB Guyana <ALIZA00> assessment rationale:

Platts assessed Liza crude on Oct. 14 based on its last-known spread to Unity Gold. No activity for Liza crude was reported in the Oct. 14 Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions:

Platts did not exclude any market data from the Oct. 14 Platts Market on Close assessment process.

Platts Unity Gold FOB Guyana Daily Rationale & Exclusions

Unity Gold FOB Guyana <AUNIA00> assessment rationale:

Platts assessed Unity Gold crude on Oct. 14 based on price movements of competing crudes and a weaker indication of a November-loading cargo that traded around Dated Brent minus $25/barrel on an FOB basis. No activity for Unity Gold crude was reported in the Oct. 14 Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions:

Platts did not exclude any market data from the Oct. 14 Platts Market on Close assessment process.

Subscriber Notes

Platts proposes to adopt Brazil Central Bank Ptax FX rate as dollar, euro to real conversions from Jan. 4, 2027

Platts, part of S&P Global Energy, proposes to assess some of its assessments utilizing Ptax foreign exchange rate references published by the Brazilian Central Bank (Bacen). This applies to several assessments containing dollar and euro to reais conversions, effective Jan. 4, 2027.

The proposal would align more closely with Brazilian market conventions. Platts understands that Ptax is widely used in financial and commercial transactions.

Under the proposal, Platts would assess the daily FX rates under the following existing Platts symbols, taking into account Ptax bid and ask closing quotes. Ptax opening and intermediate quotes would not be considered.

Symbol	Conversion
BRLUB00	EUR/BRL
USDRE00	USD/BRL
AUFUT00	
USDBR00	
USDBL00	

Additional Platts assessments that derive BRL, EUR or USD conversions from these FX symbols would also be affected by the proposed change. The full list is available here.

The publication of these FX rates would follow Platts Brazil publishing schedule. On Brazil non-publishing days, Platts would use the latest published values under these symbols for the conversions that follow other publishing schedules, in line with prevailing market practice.

Please send feedback, questions, or comments on the proposal by Nov. 25, 2026, to pricegroup@spglobal.com.

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing. Platts will consider all comments received and will make comments not marked as confidential available upon request.

Platts launches additional assessments of Venezuelan crude Oct. 5

Platts, part of S&P Global Energy, has launched daily assessments for Venezuela's Merey 16 crude on a free-on-board basis from Venezuela, as well as assessments for Boscan and Hamaca on a delivered-at-port basis along the US Gulf Coast, effective Oct. 5.

The Merey 16 assessment reflects the value of waterborne Merey 16 crude loading 30-60 days forward, on a FOB basis from the Port of Jose Terminal in Venezuela.

The assessments for Boscan and Hamaca reflect the value of waterborne Boscan and Hamaca delivering 30-60 days forward, on a DAP basis along the United States Gulf Coast.

The typical cargo size for all three assessments is 500,000 barrels.

The assessments are published as an outright price, as well as differentials to the Latin America Dated Brent strip, Latin America Brent Futures strip and Latin America WTI strip, which align with a 30–60-day delivery window.

The new symbols for the assessments are as follows:

Symbol	Description
PRUCA00	Merey 16 FOB Venezuela
PRUCB00	Merey 16 FOB Venezuela vs Latin American Brent Futures Strip
PRUCC00	Merey 16 FOB Venezuela vs Latin American WTI Strip
PRUCD00	Merey 16 FOB Venezuela vs Latin American Dated Brent Strip
PRUCE00	Boscan DAP USGC
PRUCF00	Boscan DAP USGC vs Latin American Brent Futures Strip
PRUCG00	Boscan DAP USGC vs Latin American WTI Strip
PRUCH00	Boscan DAP USGC vs Latin American Dated Brent Strip
PRUCI00	Hamaca DAP USGC
PRUCJ00	Hamaca DAP USGC vs Latin American Brent Futures Strip
PRUCK00	Hamaca DAP USGC vs Latin American WTI Strip
PRUCL00	Hamaca DAP USGC vs Latin American Dated Brent Strip

Merey 16 crude has a typical API gravity of 16 degrees and sulfur content of 3.4%. Boscan crude has a typical API gravity of 10.6 degrees and sulfur content of 5.4%. Hamaca crude has a typical API gravity of 21.2 degrees and a sulfur content of 2.2%.

In the absence of bids, offers, and trades for these crudes, Platts may assess the crude based on spreads to comparable grades. Platts may also use market information provided on a FOB basis to inform the DAP assessments.

Platts assessments reflect non-sanctioned material. Bids and offers that contain statements surrounding delivery of embargoed or sanctioned materials will be reviewed by Platts for publication and may be subject to normalization in value.

These additional assessments follow the launch of Merey 16 DAP USGC assessments March 31 .

The new assessments will be available on Platts Global Alert and Platts Crude Oil Alert pages 280 and 281. They will be published in Crude Oil Marketwire, Latin American Wire and Oilgram Price Report.

Please send any comments or feedback to americas_crude@spglobal.com and pricegroup@spglobal.com.

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing.

Platts will consider all comments received and will make comments not marked as confidential available upon request.
