Market Commentary

Platts US Gasoline Daily Market Analysis

- Gulf Coast gasoline switches to winter specs
- Chicago CBOB drops 11-12 cents after rally
- LA CARBOB rebounds 6 cents on day

In the US gasoline market, prices strengthened along the Gulf Coast on Oct. 14 as the region switched to pricing against the December NYMEX, while Chicago CBOB prices normalized after increasing around 20 cents in the first half of the week and California CARBOB grade pricing remained volatile.

Gulf Coast

USGC gasoline differentials strengthened as the market rolled to the NYMEX December RBOB contract and several grades transitioned to winter specifications, while outright values ended the day slightly weaker.

Unleaded 87 M-grade regular gasoline closed at a 24.75-cent/gallon premium to the NYMEX December RBOB contract. M-grade transitioned from 11.5 RVP to 13.5 RVP on Oct. 14, marking the beginning of winter-specification gasoline trading in the USGC region.

The move comes as the December RBOB contract ended the day at $3.1420/gal, at an 11.75-cent discount compared to November futures.

The benchmark CBOB 87 octane A-grade for Colonial Pipeline's prompt 61st cycle remained at fall-specification 12.5 RVP. Platts assessed the grade at a 1.50-cent/gal premium to NYMEX December RBOB futures, or 1.56 cents weaker day over day at an outright price of $3.1570/gal.

Regional refining margins remained elevated, with the crack spread for a barrel of West Texas Intermediate crude in Houston, Texas, at $54.82/barrel on Oct. 13, S&P Global Energy CERA data showed. The level is $39.52 on the year, offering regional refineries significantly stronger incentives.

Note: Platts line space assessments reflect the physical trade of gasoline or distillates at two locations agreed upon by the parties along the Colonial Pipeline between Pasadena, Texas, and Linden, New Jersey. The assessments represent the premium or discount paid by a buyer while taking refined product off the line at one location while giving product to the seller at another.

Atlantic Coast

On the Atlantic Coast, differentials for New York Harbor barges remained stable on the day as outright prices ticked higher.

Platts assessed 13.5 RVP RBOB NYH barges unchanged at NYMEX November RBOB futures plus 6.25 cents/gal, as outright prices rose 0.94 cent to $3.3220/gal.

Offers for premium grade gasoline in NYH were heard at futures plus 76 cents/gal, slightly lower on the week, as alkylate values were heard trading lower in the USGC. On Colonial Pipeline, 11.5 RVP M-grade gasoline was heard traded at futures plus 30 cents for Cycle 57.

The US Environmental Protection Agency proposed adding 770 million Renewable Identification Numbers to refiners' biofuel blending obligations for 2026 and 2027, fully offsetting exemptions granted to small refineries for the 2025 compliance year.

Midwest

Chicago CBOB differentials normalized after rallying by roughly 20 cents/gal during the first half of the week.

Selling interest centered on BCX CBOB, with two trades reported at futures plus 15 cents/gal and futures plus 12 cents/gal. Platts assessed the differential at the level of the latter trade, down 11 cents/gal on the day.

Wolverine maintained a premium over the rest of the complex as the turnaround at Cenovus' Lima, Ohio, refinery neared completion. Platts assessed Wolverine at futures plus 18 cents/gal, down 12 cents/gal, reflecting a trade.

West Shore and Badger CBOB were the only grades without reported trades before the 1:30 pm CT close. The combined West Shore/Badger CBOB grade, typically the least expensive product in the Chicago complex, had settled at a 6-cent premium to BCX CBOB on Oct. 13 based on market activity. Platts assessed it flat to BCX on Oct. 14, down 17 cents.

Over the prior two sessions, West Shore/Badger CBOB rose more than 30 cents/gal, Wolverine rose more than 21 cents and BCX increased 13 cents.

West Coast

Differentials for Los Angeles CARBOB rebounded, while Portland gasoline fell significantly.

Platts assessed Los Angeles CARBOB up 6 cents to NYMEX November RBOB futures plus 44 cents/gal amid a trade at futures plus 47 cents/gal and a lower offer heard at futures plus 45 cents/gal.

In San Francisco, the differential remained stable at plus 48 cents/gal amid quiet activity.

The premium/regular regrades for Los Angeles and San Francisco both narrowed 1 cent to 12 cents.

Portland differentials fell 13 cents to futures plus 4 cents/gal amid a trade heard done at that level before the market close. The premium/regular regrade also narrowed 6 cents to 12 cents, bringing the premium grade down 19 cents to futures plus 16 cents/gal.

Platts is part of S&P Global Energy.

Platts US Midwest Gasoline Assessment Rationales & Exclusions: Chicago CBOB, Group 3 Sub Octane

Gasoline Chicago West Shore/Badger CBOB Pipe <AAREL00> assessment rationale: Platts assessed 13.5 RVP C2 West Shore/Badger pipeline CBOB on Oct. 14 based on a trade heard in the market for BCX CBOB at NYMEX November RBOB futures plus 12 cents/gallon and a flat spread to West Shore CBOB. There were no positions in the Platts Market on Close assessment process.

Gasoline Unl Sub Octane Group 3 Pipeline <AAXIX00> assessment rationale: Platts assessed 11.5 RVP Group 3 V-grade suboctane on Oct. 14 based on a trade heard in the market at NYMEX November RBOB futures plus 21 cents/gal, 1 cent of backwardation per day, and a standing bid in the Platts Market on Close assessment process at futures plus 19.75 cents/gal. There were no other standing positions.

Oil USGC Daily Gasoline Unl 87, CBOB RBOB, and Line 1 Space Daily Rationales and Exclusions

Gasoline Unl 87 USGC Prompt Pipeline <PGACT00> assessment rationale: Platts assessed pipeline-delivered 13.5 RVP conventional unleaded (M4) Oct. 14 based on a standing offer in the Platts Market on Close assessment process at NYMEX December RBOB futures plus 25.00 cents/gallon. Standing positions in the MOC did not test that value.

Gasoline CBOB 87 USGC Houston Prompt Pipeline <AARQU00> assessment rationale: Platts assessed pipeline-delivered 12.5 RVP CBOB (A3) Oct. 14 based on the most recent trade heard at NYMEX December RBOB futures plus 1.50 cents/gal. Standing positions in the Platts Market on Close assessment process did not test that value.

Gasoline RBOB 83.7 USGC Houston Prompt Pipeline <AAMFB00> assessment rationale: Platts assessed pipeline-delivered 13.5 RVP RBOB (F4) Oct. 14 based on an unchanged spread to CBOB 87 (A3) of minus 1.25 cents/gal. There were no positions in the Platts Market on Close assessment process.

Colonial Pipeline Line 1 Space <AAXTA00> assessment rationale: Platts assessed Colonial Pipeline C61 Line 1 Space Oct. 14 based on the most recent trade heard at plus 5 cents/gal. There were no positions in the Platts Market on Close assessment process.

Exclusions: No trades were excluded from the Oct. 14 MOC.

Platts is part of S&P Global Energy.

Platts US Atlantic Coast Gasoline RBOB Barge Daily Rationale & Exclusions

Gasoline RBOB NY Barge <AAMGV00> assessment rationale: Platts assessed 13.5 RVP New York Harbor RBOB barge Oct. 14 at a 6.25-cent/gallon premium to NYMEX November RBOB futures, unchanged amid a lack of competitive indications. There were no positions in the Platts Market on Close assessment process.

Exclusions: No data was excluded from the Oct. 14 MOC.

Platts is part of S&P Global Energy.

Platts US Jet Fuel Daily Market Analysis

- USGC values drop alongside ULSD futures on day
- Distillate markets approach winter amid uncertainty

US Gulf Coast jet fuel dipped alongside ULSD futures on Oct. 14, while US Atlantic Coast values edged slightly higher.

Platts assessed benchmark US Gulf Coast jet Colonial Pipeline's prompt 61st cycle at $4.4633/gallon, down 4.83 cents from the previous session.

In New York Harbor, the Buckeye Pipeline benchmark rose 30 points to $4.8249/gal.

In the underlying futures markets, NYMEX front-month ULSD declined 70 points/gal on Oct. 14 to settle at $4.9274/gal.

Tight global diesel stocks and geopolitical disruptions presented upside risks to distillate prices, BofA Global Research Commodity and Derivative Strategist Francisco Blanch said in an Oct. 14 note.

"The approaching Northern Hemisphere winter therefore leaves the distillate market with exceptionally little margin for error," Blanch said. "Global oil inventories are approaching extreme seasonal lows, Europe is struggling to attract sufficient diesel imports and refiners have limited scope to increase output without shifting the shortage elsewhere in the barrel."

The front-line NYMEX ULSD crack versus WTI crude eased to $111.86/barrel at market settle from $113.10/b in the session prior.

Crude futures settled at three-week highs as Middle East supply concerns mounted amid a spate of fresh attacks on shipping in the Strait of Hormuz.

NYMEX November WTI settled 95 cents/barrel higher at $95.09/b, putting the front-month contract at the highest level since Sept. 21, and ICE December Brent climbed 37 cents/b to $106.06/b.

In a statement to Reuters on Oct. 14, Iranian officials said the country was actively targeting ships trying to cross the Strait of Hormuz after two ships were reportedly struck during an attempted transit Oct. 13, according to voluntary reports received by the United Kingdom Maritime Trade Operations Center.

Platts assessed US Gulf Coast No. 2 gasoil for Colonial Pipeline's prompt-cycle Oct. 14 based on the relationship to ultra-low sulfur diesel and the Renewable Volume Obligation cost. There were no positions in the Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: There were no exclusions in the Oct. 14 assessment process.

Platts US West Coast Jet Daily Rationale & Exclusions

Jet Kero Los Angeles CA Pipeline <PJAAP00> assessment rationale:

Platts assessed Los Angeles jet fuel on Oct. 14 based on an offer heard at NYMEX November ULSD futures minus 5 cents/gallon. There were no positions in the latest Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: There were no exclusions in the Oct. 14 assessment process.

Platts USAC Jet Barge, Pipe and Gasoil No.2 Daily Rationales and Exclusions

Jet Kero New Jersey Buckeye Pipeline <AAJNL00> assessment rationale:

Platts assessed Buckeye Pipeline jet fuel against NYMEX November ULSD on Oct. 14 based on a mid-window laycan trade at NYMEX November ULSD futures minus 10.25 cents/gallon in the Platts Market on Close assessment process.

Jet Kero New York Harbor Barge <PJAAW00> assessment rationale:

Platts assessed New York Harbor jet fuel barges on Oct. 14 based on an established relationship with Buckeye Pipeline jet fuel. There were no positions in the Platts Market on Close assessment process.

Gasoil No. 2 New York Harbor Barge <POAEG00> assessment rationale:

Platts assessed US Atlantic Coast No. 2 gasoil barges on Oct. 14 based on an established relationship to US Gulf Coast pipeline gasoil. There were no positions in the Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: There were no exclusions in the Oct. 14 assessment process.

Platts US Diesel Daily Market Analysis

- USGC diesel differentials hit lowest levels since May
- Middle East, Russia exports fall 60% in September

Gulf Coast ultra-low sulfur diesel differentials slid to their lowest level in months on Oct. 14, pressured by rising futures values and a market structure that discouraged storage, even as international supply tightened ahead of winter.

© 2026 by S&P Global Inc. All rights reserved.

©2026 S&P Global Inc. Any unauthorized use of this copyrighted material constitutes infringement of our intellectual property and will subject you to possible legal action.

Platts assessed the Gulf Coast ULSD differential down 1.25 cents/gallon at an 8.25-cent/gal discount to NYMEX November ULSD futures on the last day of Colonial Pipeline's 60th cycle amid a rise in the underlying futures contract. The differential was the lowest since May 19, when it was assessed at minus 9.75 cents/gal to futures.

The USGC ULSD outright price followed a similar trajectory, falling 1.95 cents/gal to $4.8449/gal on the last day of the cycle with November as the underlying futures contract. Prices will roll over into the backwardated December NYMEX on Oct. 15.

The M1/M2 spread stood at 17.66 cents/gal, its widest level since Sept. 30. In a backwardated market, storing barrels becomes less attractive because the futures curve declines in value over time. As a result, suppliers are incentivized to release as much product as possible into the market.

Meanwhile, combined Middle Eastern and Russian gasoil exports fell more than 60% year over year in September, ahead of peak winter demand, while US and Chinese supply increases failed to fill the gap, the International Energy Agency said Oct. 14 in its monthly Oil Market Report.

Platts is part of S&P Global Energy.

Platts USGC Daily ULSD pipeline, Export, ULSHO pipeline, and Line 2 Space Rationales and Exclusions

ULSD USGC Prompt Pipeline <AATGY00> assessment rationale:

Platts assessed US Gulf Coast Colonial Pipeline ULSD Oct. 14 based on trades seen at a minus 8.25-cent/gallon premium to NYMEX November ULSD futures during the Platts Market on Close assessment process.

ULSD USGC Export <AAXRV00> assessment rationale:

Platts assessed US Gulf Coast Export ULSD on Oct. 14 based on the most recent notionally heard value at

a 14-cent/gal premium to Gulf Coast pipe. There were no positions in the Platts Market on Close assessment process.

ULSD Heating Oil USGC Prompt Pipeline <AAXFD00> assessment rationale:

Platts assessed US Gulf Coast ultra-low sulfur heating oil for Colonial Pipeline's prompt cycle Oct. 14 based on the most recent trade heard at a 1-cent/gal premium to the ultra-low sulfur diesel pipeline assessment minus the Renewable Volume Obligation cost. There were no positions in the Platts Market on Close assessment process.

Colonial Pipeline Line 2 Space <AAXTD00> assessment rationale:

Platts assessed Colonial Pipeline Line 2 Space on Oct. 14 based on the most recent notional value heard at plus 0.50-cent/gal. There were no positions in the Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Oct. 14 assessment process.

Platts US Midwest ULSD pipeline Daily Rationales & Exclusions

ULSD FOB Chicago Pipe <AATHA00> assessment rationale:

Platts assessed Chicago Pipeline ULSD Oct. 14 based on a trade heard at a 15-cent/gallon discount to NYMEX November ULSD futures for the related Wolverine Pipeline. There were no positions in the Platts Market on Close assessment process.

ULSD Group 3 Pipeline <AATHB00> assessment rationale:

Platts assessed Group 3 X-Grade ULSD Oct. 14 based on a trade seen at a 19.25-cent/gal premium to NYMEX November ULSD futures during the Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Oct. 14 assessment process.

Platts US Atlantic Coast ULSD Barge and Pipeline Daily Rationales & Exclusions

ULSD New York Harbor Barge <AATGX00> assessment rationale:

Platts assessed New York Harbor Barge ULSD Oct. 14 based on the most recent trade heard at a 14-cent/gallon premium to NYMEX November ULSD futures for related Colonial Pipeline Line 3 barrels. There were no positions in the Platts Market on Close assessment process.

ULSD USAC Linden Pipeline Prompt Cycle <AAXPW00> assessment rationale:

Platts assessed Colonial Pipeline ULSD delivering off Line 3 Oct. 14 based on the most recent trade heard at a 14-cent/gal premium to NYMEX November ULSD futures. There were no positions in the Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Oct. 14 assessment process.

Platts Americas Residual Fuel Daily Market Analysis

- US Gulf Coast fuel prices climb
- Marine fuel 0.5%S rises by $15.25/mt
- HSFO bulk pricing increases $1.93/b

US fuel oil barge prices rose across the board Oct. 14, following competitive bid-side market activity observed across the sulfur grades during the Platts Market on Close assessment process.

Platts, part of S&P Global Energy, assessed US Gulf Coast marine fuel 0.5%S bulk pricing at $716/metric ton, up $15.25 day over day.

A standing bid from Vitol Inc. for the back-end laycan of Oct. 27-29 at $714.50/mt tested notional value.

In the swaps market, the balance-month October USGC marine fuel 0.5%S swap rose $2.05 to $111.55/barrel ($708.35/mt), while the Month 1 November swap climbed $1.55 to $110.05/b ($698.92/mt).

For USGC high sulfur fuel oil (HSFO), Platts assessed bulk pricing at $85.37/b, up $1.93, following competitive bidding activity observed during the MOC.

During the MOC, Novum Trading Corp. was observed looking to buy 45,000 barrels of USGC FOB Houston for the back-end loading window of Oct. 27-29.

After gradually and incrementally increasing their bid, Novum would eventually attract counterparty selling interest from BP Products North America Inc. at a $4.30/b premium to the M1 November USGC HSFO swap, testing notional value.

Other bidding activity observed during the MOC did not test notional value.

In the swaps market, the balmo October USGC HSFO swap rose $1.75 to $83.70/b, while the M1 November swap climbed $1.55 to $80.70/b.

In upstream news, the December ICE front-month Brent futures contract rose 50 cents day over day to close at $106.08/b.

Platts US Atlantic Coast 0.5% Marine Fuel Barge Daily Rationales & Exclusions

Platts 0.5% Marine Fuel $/b Dlvd US Atlantic Coast <AUAMA00> MOC rationale:

Platts assessed USAC marine fuel 0.5%S Oct. 14 based on the $/mt assessment for USAC marine fuel 0.5%S with a conversion factor of 6.35 to derive the value for $/b.

Platts 0.5% Marine Fuel $/mt Dlvd US Atlantic Coast <AUAMB00> MOC rationale:

Platts assessed USAC marine fuel 0.5%S Oct. 14 based on movement in the underlying USAC marine fuel 0.5%S swaps market. There was no activity during the Platts Market on Close assessment process.

Platts is part of S&P Global Energy.

Exclusions: Platts did not exclude any market data from the Oct. 14 MOC.

Platts US Gulf Coast HSFO Daily Rationale & Exclusions

USGC HSFO <PUAFZ00> assessment rationale:

Platts assessed US Gulf Coast high sulfur fuel oil (HSFO) Oct. 14 based on a bid-side trade for the back-end laycan of Oct. 27-29 during the Platts Market on Close assessment process. Other bidding activity during the MOC did not test the notional value.

Platts is part of S&P Global Energy.

Exclusions: Platts did not exclude any market data from the Oct. 14 assessment process.

Platts US Renewable Volume Obligation – Calculated Values (PBF page 302)

		¢/gal	Change
RVO (Current Year)	RVOR002	30.9295	-0.3677

RVOs are Renewable Volume Obligation values. RVO is the aggregate cost of the Renewable Identification Number percentages per gallon of transportation fuel for biomass based diesel, ethanol, advanced biofuel, and cellulosic ethanol as mandated by US Environmental Protection Agency in the Renewable Fuel Standard Program (RFS2). Platts calculates these RVO values factoring the value of D6, D4, D5, D3 renewable fuel RIN credits as assessed by Platts for the respective RVO years; RINs are assessed as cents/RIN.Current year RVO reflects the current calendar year

You may access the separate RINs factoring into the RVO calculation by acquiring a license to Platts Biofuelscan or Platts Biofuels Alert.

Platts US LPG Spot Daily Commentary

- Butane hits $1.75/gal, highest since March 2022
- October LPG loadings at 2.5 million b/d
- Ethane exports to China at 730,000 b/d month-to-date

US Gulf Coast butane prices rose slightly Oct. 14, propane was up over 2 cents, and ethane prices in the region approached yearlong highs.

Platts, part of S&P Global Energy, assessed butane at Mont Belvieu's Enterprise terminal 0.25 cent higher at $1.75/gal, the highest since March 25, 2022.

Propane growth outstripped butane on the day, rising 2.25 cents to $1.0325/gal, the highest since mid-September 2022. With Energy Transfer propane also rising on the day, the butane-propane spread fell below 70 cents, but remained at record highs.

October US LPG loadings were at 2.5 million b/d as of Oct. 14, below September's 2.6 million b/d average, according to S&P Global Commodities at Sea shipping data.

US propane to Japan is loading slightly less than 1 million b/d month-to-date, while Indonesia, Morocco, China and India are importing the largest volumes of US butane.

The US is also loading nearly 730,000 b/d of ethane, largely bound for China, though of that total, India is importing 170,000 b/d.

That ethane export draw could partially explain the high ethane prices at Enterprise, where prompt barrels are pricing at 30.875 cents/gal, approaching 31 cents/gal seen on Dec. 5, 2025.

Platts Canada LPG Spot Daily Commentary

- Edmonton butane hits all-time high
- Strong US-Canada demand drives butane surge
- Edmonton propane moves 2.88 cents higher

Edmonton butane prices continued to climb to new highs on Oct. 14, as demand in the US and Canada propelled prices higher.

Platts assessed Edmonton butane in Western Canada 0.83 cent higher day over day at $1.60771/gallon, again marking a record since Platts began assessing Edmonton butane in November 2024.

Edmonton butane's ratio to the West Texas Intermediate calendar month average maintained at 72.5% for October prompt barrels, also a record.

Butane prices at Sarnia in Eastern Canada also rose, inching 0.25 cent higher to 180.50 cents/gal. A market source recently noted that Sarnia butane is being shipped to the US Midwest and US Atlantic Coast for blending gasoline to higher RVP levels.

Propane was the biggest mover of the day, with Edmonton propane assessed up 2.88 cents at 91 cents/gal, and Sarnia propane was assessed 2.25 cents higher at 106.25 cents/gal.

Platts US Base Oils Weekly Commentary

- Group I, II prices fall amid pressure
- Group III supply tightens on tensions

US base oil prices showed divergent trends, with the Oct. 14 assessment reflecting unchanged prices for some Group I grades and a drop in most Group II grades while uncertainty increased for Group III supply amid a recent escalation of tensions in the Middle East.

In the Group I segment, Platts assessed domestic SN150 and SN500 spot pricing steady at $6.50/gallon and $7.50/gallon, respectively.

For Bright Stock, Platts assessed domestic spot pricing down 10 cents at $9.40/gal as market participants noted downward pressure on this grade amid Asian quotes, although they remained doubtful about deliveries.

"Prices were under pressure in the US, but since some tankers were just attacked offshore Oman, this brings us back to crude uncertainty," a US supplier said.

On Oct. 11, four outbound oil tankers were attacked in the Strait of Hormuz while a fifth was struck near Sohar, Oman and a container ship was also hit, according to the UK Maritime Trade Operations reports.

In the Group II segment, Platts assessed domestic 220N and 600N spot pricing down 5 cents at $7.10/gal and $7.45/gal, respectively. For 100N, Platts assessed spot pricing up 10 cents at $7.20/gal due to an increase in diesel prices, which competes with lighter grades of base oils.

For the Group III segment, Platts assessed domestic 4 cSt, 6 cSt and 8 cSt up 5 cents at $13.25/gal, $13.00/gal and $13.00/gal, respectively as uncertainty grows due to the attacks near the Strait of Hormuz and US-Iran escalating tensions.

"The Group III is still tight, but hearing some cargos may help alleviate some pressure," a US-based source said.

Some market participants were positive about the arrival of Asian-origin products and the recent announcement of a partial resumption of production at Shell's PLC Pearl Gas-to-Liquids plant in Ras Laffan Industrial City, Qatar, which was damaged in March amid Iranian strikes early in the war in the Middle East.

A spokesperson told Platts, part of S&P Global Energy, that this will allow them to build a limited amount of product inventory in storage, although their ability to ship product remains subject to the regional security situation.

In upstream energy markets, the December Brent contract rose 50 cents day over day to close at $106.08/barrel, while the week-over-week change reflected an increase of $5.95/barrel.

Platts UK HEFA SAF Certificates Daily Assessment Rationale

Platts assessed current-year UK HEFA SAF Certificates unchanged at 50 pence/certificate on Oct. 14, with no disproving indications heard on the day.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <UKSFY01, UKSFY02, UKSFY03>

Brazilian Central Bank (Bacen). This applies to several assessments containing dollar and euro to reais conversions, effective Jan. 4, 2027.

The proposal would align more closely with Brazilian market conventions. Platts understands that Ptax is widely used in financial and commercial transactions.

Under the proposal, Platts would assess the daily FX rates under the following existing Platts symbols, taking into account Ptax bid and ask closing quotes. Ptax opening and intermediate quotes would not be considered.

Symbol	Conversion
BRLUB00	EUR/BRL
USDRE00	USD/BRL
AUFUT00	
USDBR00	
USDBL00	

Additional Platts assessments that derive BRL, EUR or USD conversions from these FX symbols would also be affected by the proposed change. The full list is available here.

The publication of these FX rates would follow Platts Brazil publishing schedule. On Brazil non-publishing days, Platts would use the latest published values under these symbols for the conversions that follow other publishing schedules, in line with prevailing market practice.

Please send feedback, questions, or comments on the proposal by Nov. 25, 2026, to **pricegroup@spglobal.com.**

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing. Platts will consider all comments received and will make comments not marked as confidential available upon request.

Platts invites feedback on its Global Jet Indexes methodology guide

As part of its commitment to open and transparent pricing and product specifications, Platts, part of S&P Global Energy, would like to invite feedback on its Global Jet Indexes Guide, specifically the guidelines described in the methodology guide posted online at https://www.spglobal.com/content/dam/spglobal/ci/en/documents/platts/en/our-methodology/methodology-specifications/refined-products/world-jet-indexes-specifications.pdf

Platts reviews all methodologies annually to ensure they continue to reflect the physical markets under assessment, and regularly assesses the relevance of methodologies through continuous contact with the market.

Feedback on methodologies is always welcomed by Platts.

Please send all feedback, comments, or questions to oilgroup@spglobal.com and pricegroup@spglobal.com.

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing.

Platts will consider all comments received and will make comments not marked as confidential available upon request.

New Platts Americas new SAF assessments

The following Platts Americas new SAF assessments have been created under the Market Data categories BF(Agriculture: Biofuels), PL(Oil Products: Latin America) and UG(Oil Products: US Gulf Coast).

They will appear on:

- Publications: Aviation weekly report, Biofuelscan report, Biomass-Based Diesel Report, Brail Fuels daily report, Combustíveis Brazil, Oilgram Price Report, and US Marketscan Report.
- Fixed Pages: Platts Biofuel Alert pages PBF0010, PBF0011, PBF0012, PBF0220, PBF0221 and PGA0158, PGA0166, PGA0167, PGA0168, PGA0450, PGA0451, PGA0480, PGA0483 and PRF0158, PRF0166, PRF0167, PRF0168, PRF0450, PRF0451, PRF0480 and PRF0483

They are scheduled to begin updating on Oct. 1, 2026.

Platts clarifies LSK, ULSK specifications for USGC, USAC

Platts clarifies specifications reflected for US Gulf Coast and US Atlantic Coast LSK, ULSK assessments

Platts, part of S&P Global Energy, would like to clarify that its ultra low sulfur kerosene assessments for the US Gulf Coast and US Atlantic Coast reflect Colonial Pipeline's fungible aviation kerosene grade 51 specifications.

ULSK, at max 15 parts per million sulfur, is typically used as low sulfur blendstock to mix with diesel during fall and winter, but also year-round for home space heating, peak power generation units and some East Coast bus transportation systems.

Low sulfur kerosene, or LSK at max 400 ppm, reflects Colonial Pipeline's aviation kerosene grade 55 specifications.

The grades and symbols to which this clarification applies are:

US Gulf Coast

Assessment	Symbol	Sulfur content
Jet Kero 55 USGC Prompt Pipeline	PJABP00	Max 400 ppm
Jet Kero ULS USGC Prompt Pipeline	AAVTL00	Max 15 ppm

US Atlantic Coast

Assessment	Symbol	Sulfur content
Jet Kero LS New Jersey Buckeye Pipeline	AAJNN00	Max 400 ppm
Jet Kero LS New York Harbor Barge	PJABJ00	Max 400 ppm
Jet Kero ULS New York Harbor Barge	AAVTI00	Max 15 ppm

For Midwest, Platts Jet Kero ULS No1 Chicago Pipe assessment (PJACD00) reflects a maximum sulfur limit of 15 ppm.

Please send all comments or questions to **americas_refined_products@spglobal.com** or **pricegroup@spglobal.com** .

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing.

Platts will consider all comments received and will make comments not marked as confidential available to the public upon request.

Platts proposes to launch weighted indexes for Chicago CBOB, ULSD

Platts, part of S&P Global Energy, is proposing to launch Chicago basket indexes for gasoline and diesel from March 2, incorporating the independent assessments for the major pipelines and Buckeye Complex and weighting them by trading volume, as well as adding a new, separate assessment for Chicago West Shore and Badger pipeline ULSD.

Feedback from market participants has indicated the need for Chicago-weighted basket indexes that reflect recent volumes traded on the Badger, West Shore, and Wolverine pipelines, as well as the Buckeye Complex.

The proposed weightings would be calculated by tracking recent trades across the West Shore, Badger, and Wolverine pipelines, as well as the Buckeye Complex. Total reported trades would be compiled on a cyclical basis, assuming a minimum volume of 10,000 barrels where not specified. These trades will then be sorted by pipeline to determine the percentage contribution of each component.

The weighted index would be calculated from the average of the differentials to NYMEX futures for the West Shore/Badger pipelines, Wolverine pipeline and BCX assessments, adjusted by their corresponding weightings.

For example, if Platts is assessing Cycle 2 for Chicago ULSD and traded volumes from the previous cycles came out to 20% West Shore and Badger, 30% Wolverine and 50% Buckeye Complex and the pipeline differentials were assessed at plus 2 cents/gal, plus 3 cents/gal and plus 3.50 cents/gal, respectively, the index basket differential would be plus 3.05 cents/gal.

Platts' current assessments for Chicago CBOB and ULSD are as follows:

Symbol	Name
AATHA00	ULSD Chicago pipeline
AGCWC00	ULSD Chicago Wolverine Pipeline
ACBAE00	ULSD Chicago BCX
AAREL00	Gasoline CBOB Chicago pipeline
ACBAA00	Gasoline CBOB Chicago BCX
AGCWA00	Gasoline CBOB Chicago Wolverine Pipeline

The proposed Chicago basket indexes would be as follows:

Name
Gasoline CBOB Chicago Basket
ULSD Chicago Basket

Platts is concurrently seeking feedback on how to incorporate West Shore and Badger into the weighted index when the 1 psi waiver is in place during the summer. More information on how Platts will adjust the West Shore and Badger assessments in accordance with the 1 psi waiver can be found here.

Additionally, Platts seeks feedback on the naming conventions for the proposal. Platts proposes to amend the assessment name from Gasoline CBOB Chicago pipeline to Gasoline CBOB West Shore and Badger pipeline to better represent the products assessed. This change follows the Feb. 3, 2025, removal of the Wolverine Pipeline from the basket underpinning the generic Chicago assessment due to the anticipated removal of the 1 psi waiver in multiple Midwest states and a division in RVP.

Platts is also proposing to launch a separate West Shore/Badger assessment for Chicago ULSD; this would not replace the existing generic assessment, which would remain unchanged. The name of the new assessment would be ULSD Chicago West Shore and Badger Pipeline.

The indexes would appear on PGA pages 350, 351, 154, 24, 482, 410 and 411, as well as in US Marketscan, Oilgram Price Report, and on Platts Connect.

Please send all feedback and comments by Jan. 23 to **americas_products@spglobal.com** and **pricegroup@spglobal.com.**

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing. Platts will consider all comments received and will make comments not marked as confidential available upon request.

Platts invites feedback on US gasoline RVP calendar for 2026

As part of its commitment to open and transparent pricing and product specifications, Platts, part of S&P Global Energy, would like to invite feedback regarding publishing dates and/or cycles for 2026 US gasoline RVP shifts.

The 2026 calendar largely follows 2025 norms, with no notable deviations from prior years. The calendar will be updated throughout the year as more information becomes available.

The shift dates are based on relevant pipeline schedules, historical information, and feedback from market participants.

US Gulf Coast shifts are based on the Colonial Pipeline schedule. US Atlantic Coast shifts are based on Buckeye Pipeline and Colonial Pipeline calendars.

On the West Coast, Los Angeles, San Francisco and Arizona RVP changes are based on Kinder Morgan's SFPP schedule, while Portland and Seattle shifts are based on Olympic Pipeline's calendar.

In the Midwest, Group 3 shifts are based on the ONEOK Pipeline schedule, while Chicago shifts are based on Explorer Pipeline and Buckeye Complex schedules.

The US Environmental Protection Agency removed a waiver in eight Midwestern states that allowed for an additional 1 psi during the summer. Platts will adjust the RVP Calendar for Chicago CBOB in accordance with the implementation of the waiver. More information can be found here.

For questions or comments, please contact **americas_products@spglobal.com** with a cc to **pricegroup@spglobal.com.**

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing. Platts will consider all comments received and will make comments not marked as confidential available upon request.
