Market Commentary

Platts US Pipeline Crude Daily Commentary

- Mars premium drops $1 to $1.25/b vs WTI
- Iran targets ships crossing Strait of Hormuz

Outright prices for crude oil on the US Gulf Coast were mixed Oct. 14 amid a spate of fresh attacks on shipping in the Strait of Hormuz.

Platts assessed Mars on the USGC at a $1.25/b premium to WTI, down $1 day over day. On an outright basis, Mars finished down 6 cents at $96.34/b.

Platts assessed WTI Midland unchanged at a 45-cent/barrel premium to WTI. On an outright basis, WTI Midland rose 94 cents to $95.54/b.

On a volume-weighted basis, Platts assessed WTI Midland at a 37-cent/b premium to WTI, down 10 cents day over day. This was based on a volume of 390,000 barrels.

In a statement to Reuters Oct. 14, Iranian officials said the country was actively targeting ships trying to cross the Strait of Hormuz after two vessels were reportedly struck during an attempted transit Oct. 13, according to voluntary reports received by the UK Maritime Trade Operations Center.

The attacks "support our view that Iran is deliberately seeking to put additional pressure on the oil market. We see a growing risk that the recovery in Middle Eastern exports during September and October

©2026 S&P Global Inc. Any unauthorized use of this copyrighted material constitutes infringement of our intellectual property and will subject you to possible legal action.

will prove short-lived," Global Risk Management analyst Arne Rasmussen said.

Vessel transits via the strait climbed to 26 on Oct. 13 from a revised 24 the day prior, S&P Global Commodities at Sea data showed Oct. 14.

Meanwhile, Houthi militants have attacked Saudi Arabian Oil Co.'s sites in Dhahran, home to the company's headquarters, and in Riyadh, while vowing to continue targeting the company's oil facilities, according to an Oct. 14 statement from the Yemen-based group.

Platts is part of S&P Global Energy.

Platts US Gulf Coast Export Crude Daily Commentary

- AGS premium rises 81 cents to $96.92/barrel
- IEA slashes 2027 oil demand by 600,000 b/d

The Platts American Gulf Coast Select premium rose Oct. 14, as the International Energy Agency released its latest monthly Oil Market report.

Platts, part of S&P Global Energy, assessed AGS, the value for barrels of WTI Midland loaded on an FOB basis, at $96.92/barrel, up 81 cents from the previous session.

The AGS premium to cash increased by 13 cents to $3.19/barrel, while its discount to the forward Dated Brent strip narrowed from $11.84/b to $10.76/b.

Month-decade premiums to WTI at the Magellan East Houston terminal were unchanged, with the premium for first-decade loaders assessed at MEH plus 75 cents/b, second-decade loaders at MEH plus 50 cents/b, and third-decade loaders at MEH plus 20 cents/b.

The International Energy Agency, in its latest monthly Oil Market Report released Oct. 14, cut its forecasts for global oil demand this year and slashed its estimate for next year's demand recovery, warning that diesel supplies would remain tight well into next

year as the Middle East war continued to hit supplies and fuel pump prices.

World oil demand was set to decline by an average of 2.6 million b/day in 2026 as the impact of the war in the Middle East weighed on markets, with demand growth not expected to return to positive territory until March 2027, the IEA said. The agency kept its average 2026 world oil demand at 102.4 million b/d but cut 2027 demand to 104.4 million b/d from 105 million b/d in its September report, leaving 2027 consumption at about 620,000 b/d, or 0.6%, below 2025 levels.

Platts Canadian Pipeline Crude Daily Commentary

- Canadian sweet crude prices continue to climb
- WCS differentials weaken across all hubs

Canadian sweet crude differentials continued to strengthen on Oct. 14, as Western Canadian Select differentials softened across all locations.

Syncrude Sweet Premium at Edmonton, Alberta, rose for the seventh-straight reporting day, moving to its strongest differential since Aug. 20. Mixed Sweet at Edmonton, Alberta, also strengthened from the previous day, rising to its strongest differential since Sept. 11. Platts assessed Syncrude Sweet Premium and Mixed Sweet at premiums of $14.25/barrel and $2.40/b, respectively, to the WTI CMA, narrowing by $0.75/b and $1.40/b day over day.

Market sources told Platts that lower supply and previous refinery turnarounds are contributing to the higher sweet crude prices.

"I would imagine because it's all diesel, and cracks are incredible," a US-based crude trader said. "There was also a lot of turnaround activity in September and October, so the market was probably short to begin with."

Western Canadian Select differentials collectively weakened, following the previous day's short-lived

Platts European Feedstocks Daily Commentary

- LSSR supply stays high amid unit maintenance
- VGO loadings jump to 120,900 tons weekly

European low sulfur straight run remained well supplied Oct. 14, despite firming VLSFO providing support, while VGO loadings were higher week over week.

Low sulfur straight run remained well offered across Europe as secondary-unit maintenance reduced appetite for LSSR material.

However, VLSFO cracks had been moving higher over the past week, leading to increased blending demand for LSSR into the cracked very low sulfur fuel oil pool.

In the VGO market, European and Russian loadings rose to 120,900 metric tons in the week to Oct. 9, according to the latest S&P Global Commodities at Sea data. This marks an increase from the week prior, when no volumes were loaded.

Supporting the overall feedstocks complex were diesel cracks, which remained robust at $92.14/b Oct. 13, according to Platts data.

The Platts Market on Close assessment process recorded no bids or offers for feedstocks during the session.

Platts is part of S&P Global Energy.

Platts NW Europe Fuel Oil SR 0.5-0.7%S Daily Rationale & Exclusions

Straight Run 0.5-0.7%S FOB NWE cargo <PKABA00> assessment rationale:

Platts assessed the LSSR FOB NWE differential at 30 cents/b above Mo1 ICE Brent crude futures, based on previous market indications. The outright LSSR price was derived using the dollars per barrel to metric ton conversion factor of 6.77 for LSSR. No bids or offers were reported in the Platts Market on Close assessment process.

Exclusions: None

Platts is part of S&P Global Energy.

US MTBE: Prices fall as export demand eases, but supply stays tight

- Offer at November RBOB plus 118 cents/gal
- USGC prices at $170.90/mt discount to European levels

US Gulf Coast prices fell Oct. 14 as easing export demand weighed on outright values, even as underlying supply remained tight.

Platts assessed US Gulf Coast spot MTBE at 444.03 cents/gallon FOB USG, 12.86 cents lower day over day.

The most competitive offer left outstanding at the close of the Platts Market on Close assessment process stood at November RBOB plus 118.00 cents/gal, which could reflect lower export demand.

The USGC MTBE market was described as tight, despite the differential to November RBOB falling 13.80 cents to 118.08 cents/gal, considering a 0.25-point backwardation.

A market participant said the MTBE differential to RBOB had risen to near three-year highs on Oct. 13 on word a major buyer had switched its European plants from MTBE to ETBE production, creating shorts that were being covered with US Gulf Coast material and tightening domestic supply.

The source said a potential switch of one or both European plants back to MTBE production as gasoline demand fades into the winter season would be a key factor in determining the direction of the differential.

USGC MTBE prices were calculated at a $170.90/mt discount to European prices.

November RBOB settled 0.94 cents higher at 325.95 cents/gal.

Platts is part of S&P Global Energy.

Platts US MTBE Daily Rationale

Platts assessed US Gulf Coast spot MTBE at 444.03 cents/gallon FOB USG Oct. 14, 12.86 cents lower on the day.

The MTBE differential to front-month November RBOB fell 13.80 cents on the day to plus 118.08 cents/gal.

Platts placed the MTBE differential to front-month November RBOB for back end laycan with Oct. 25-29 loading at plus 117.95 cent/gal, 13.80 cents lower day over day. The placement came below an offer at November RBOB plus 118.00 cents/gal that was outstanding at the end of the Platts Market on Close assessment process as Trafigura offered 25,000 barrels of MTBE for Oct. 25-29 loading.

Platts placed the MTBE differential to front-month November RBOB for mid-window laycan with Oct. 22-26 loading at plus 118.08 cents/gal, 13.80 cents lower day over day, maintaining the previous market structure amid no disproving indications.

Platts placed the MTBE differential to front-month November RBOB for front-end laycan with Oct. 19-23 loading at plus 118.20 cents/gal, 13.80 cents lower day over day, maintaining the previous market structure amid no disproving indications.

November RBOB settled 0.94 cents higher at 325.95 cents/gal.

Platts is part of S&P Global Energy.

Subscriber Notes

Platts corrects monthly averages for Canadian crudes, deletes erroneously published assessments for Sept. 30

Platts, part of S&P Global Energy, has deleted Canadian crude assessments published on Sept. 30. Platts published the assessments in error on a Canadian holiday, which affected the calculation of monthly averages.

The impacted assessments are as follows:

Symbol	Description
AHEBC00	Hebron FOB Canada vs Canada Dated Brent Strip $/bbl

The assessments are published in the Crude Oil Marketwire, North America Crude and Products Scan, Oilgram Price Report, Oilgram Price Report Price Supplement, and on Platts Global Alert and Platts Crude Oil Alert pages PGA211, PGA230, PGA231, PGA1250, PCR211, PCR230, PCR231, PCR1250.

Please send all comments or questions to **americas_crude@spglobal.com** & **pricegroup@spglobal.com.**

Platts launches additional assessments of Venezuelan crude Oct. 5

Platts, part of S&P Global Energy, has launched daily assessments for Venezuela's Merey 16 crude on a free-on-board basis from Venezuela, as well as assessments for Boscan and Hamaca on a delivered-at-port basis along the US Gulf Coast, effective Oct. 5.

The Merey 16 assessment reflects the value of waterborne Merey 16 crude loading 30-60 days forward, on a FOB basis from the Port of Jose Terminal in Venezuela.

The assessments for Boscan and Hamaca reflect the value of waterborne Boscan and Hamaca delivering 30-60 days forward, on a DAP basis along the United States Gulf Coast.

The typical cargo size for all three assessments is 500,000 barrels.

The assessments are published as an outright price, as well as differentials to the Latin America Dated Brent strip, Latin America Brent Futures strip and Latin America WTI strip, which align with a 30–60-day delivery window.

The new symbols for the assessments are as follows:

Symbol	Description
PRUCA00	Merey 16 FOB Venezuela
PRUCB00	Merey 16 FOB Venezuela vs Latin American Brent Futures Strip
PRUCC00	Merey 16 FOB Venezuela vs Latin American WTI Strip
PRUCD00	Merey 16 FOB Venezuela vs Latin American Dated Brent Strip
PRUCE00	Boscan DAP USGC
PRUCF00	Boscan DAP USGC vs Latin American Brent Futures Strip
PRUCG00	Boscan DAP USGC vs Latin American WTI Strip
PRUCH00	Boscan DAP USGC vs Latin American Dated Brent Strip
PRUCI00	Hamaca DAP USGC
PRUCJ00	Hamaca DAP USGC vs Latin American Brent Futures Strip
PRUCK00	Hamaca DAP USGC vs Latin American WTI Strip
PRUCL00	Hamaca DAP USGC vs Latin American Dated Brent Strip

Merey 16 crude has a typical API gravity of 16 degrees and sulfur content of 3.4%. Boscan crude has a typical API gravity of 10.6 degrees and sulfur content of 5.4%. Hamaca crude has a typical API gravity of 21.2 degrees and a sulfur content of 2.2%.

In the absence of bids, offers, and trades for these crudes, Platts may assess the crude based on spreads to comparable grades. Platts may also use market information provided on a FOB basis to inform the DAP assessments.

Platts assessments reflect non-sanctioned material. Bids and offers that contain statements surrounding delivery of embargoed or sanctioned materials will be reviewed by Platts for publication and may be subject to normalization in value.

These additional assessments follow the launch of Merey 16 DAP USGC assessments March 31 .

The new assessments will be available on Platts Global Alert and Platts Crude Oil Alert pages 280 and 281. They will be published in Crude Oil Marketwire, Latin American Wire and Oilgram Price Report.

Please send any comments or feedback to americas_crude@spglobal.com and pricegroup@spglobal.com.

For written comments, please provide a clear indication if comments are not intended for publication by Platts for public viewing.

Platts will consider all comments received and will make comments not marked as confidential available upon request.
